Title: Control of Alcohol and Drug Use in Railroad Operations.

OMB Control Number: 2130–0526.

Type of Request: Extension without change of a previously approved collection.

Affected Public: Businesses.

Abstract: The information collection requirements contained in pre-employment and “for cause” testing regulations are intended to ensure a sense of fairness and accuracy for railroads and their employees. The principal information—evidence of unauthorized alcohol or drug use—is used to prevent accidents by screening personnel who perform safety-sensitive service. FRA uses the information to measure the level of compliance with regulations governing the use of alcohol or controlled substances. Elimination of this problem is necessary to prevent accidents, injuries, and fatalities of the nature already experienced and further reduce the risk of a truly catastrophic accident.

Form Number: FRA F 6180.73, 6180.74, 6180.94A, 61880.94B.

Title: Trespasser Death Study.

OMB Control Number: 2130–0563.

Type of Request: Reinstatement of a previously approved collection.

Affected Public: Businesses.

Abstract: Trespasser deaths on railroad rights-of-way and other railroad property are the leading cause of fatalities attributable to railroad operations in the United States. In order to address this serious issue, interest groups, the railroad industry, and government (Federal, State, and local) must know more about the individuals who trespass. With such knowledge, specific educational programs, materials, and messages regarding the hazards and consequences of trespassing on railroad property can be developed and effectively distributed. Due to the lack of available demographic data, FRA proposes to conduct a follow-up study to the one released in 2008 titled *Rail Trespasser Fatalities: Developing Demographic Profile*. The previous study used a private contractor to obtain additional demographic data for the time period of 2003–2005 from local county medical examiners so as to develop a general, regional profile of “typical” trespassers in order to target audiences with appropriate education and enforcement campaigns that will reduce the annual

number of injuries and fatalities. The proposed or updated study will cover six additional years of demographic data, and will be used to determine the validity of the earlier regional profile of "typical" trespassers or establish a new regional profile of "typical trespassers."

49 U.S.C. 5335(a) and (b) National Transit Database

The information collected is used to determine eligibility for funding and to monitor the grantees' progress in implementing and completing project activities. The **Federal Register** notice with a 60-day comment period soliciting comments was published on November 7, 2011 (Citation 76 FR 68811). No comments were received from that notice.

SUPPLEMENTARY INFORMATION:

Title: 49 U.S.C. 5335(a) and (b) National Transit Database.

Abstract: 49 U.S.C. Section 5335(a) and (b) requires the Secretary of Transportation to maintain a reporting system, using a uniform system of accounts, to collect financial and operating information from the nation's public transportation systems. Congress created the NTD to be the repository of transit data for the nation to support public transportation service planning. FTA has established the NTD to meet these requirements, and has collected data for over 30 years. FTA continues to seek ways to reduce the burden of NTD reporting, most recently introducing its new Sampling Manual in 2010 to reduce the burden of passenger mile sampling and introducing its new Small Systems Waiver in 2011 to reduce the reporting burden on small transit systems.

The NTD is comprised of four modules, Rural, Annual, Monthly, and Safety & Security.

NTD Rural Module: State DOTs and tribal governments participating in the Tribal Transit Program.

Estimated Annual Burden: Currently FTA receives reports from 54 State and Territorial DOTs, and from 56 Tribal Transit grant recipients. Combined, these States and Tribes report on behalf of approximately 1,450 subrecipients from FTA's Rural (Section 5311) Formula Program. For each subrecipient, the State or Tribe provides identifying information, sources of operating funds, sources of capital funds, vehicle revenue miles, vehicle revenue hours, and unlinked passenger trips. Additionally, a revenue vehicle inventory is reported, as well as total fatalities, injuries, and safety incidents for the year. FTA estimates that it takes approximately 20 hours to report on

behalf of each subrecipient, including the time needed for the subrecipient to gather the information and report it to its State DOT, the time for the State DOT to assemble the data and submit it to FTA, and the time to respond to validation questions from FTA about the data.

Estimated Total Annual Burden: 29,000 hours.

Frequency: Annual reports.

NTD Annual Module—Small Systems Waiver: FTA expects about 300 transit systems with 30 or fewer vehicles to claim a Small Systems Waiver.

Estimated Annual Burden: FTA provides reduced reporting requirements to urbanized area transit systems with 30 or fewer vehicles. These systems are exempt from sampling for passenger miles and report only summary financial and operating statistics compared to full reporters in urbanized areas, similar to what is required of the rural subrecipients. Additionally, they also report contact information, funding allocation information, a revenue vehicle inventory, the number of stations and maintenance facilities, and total injuries, fatalities, and safety incidents. The reports are also required to be reviewed by an auditor and certified by the CEO. Systems with this waiver are also exempt from the Monthly and Safety & Security Modules. FTA estimates that completing a report for a Small Systems Waiver requires approximately 27 hours, including time to assemble the information and respond to validation questions from FTA about the report.

Estimated Total Annual Urban Burden: 8,100 hours.

Frequency: Annually.

NTD Annual Module—Full Reports: FTA expects about 400 transit systems to file complete reports, including 10 reports that represent a consolidated report from numerous small systems.

Estimated Annual Burden: The Full Report to the Annual Module is comprehensive. Basic contact information, as well as information on subrecipients and purchased transportation contracts must be provided. Sources of funds for operating expenses and capital expenses must be provided, as well as detailed operating and capital expenses for each mode by function and object class. Key service data collected includes vehicle revenue miles, vehicle revenue hours, unlinked passenger trips, and passenger miles traveled; these must be provided by average weekday, average Saturday, average Sunday, and as an annual total. Most systems that do not inherently collect passenger mile information (such
