Abstract: This Information Collection Request (ICR) seeks clearance to select teacher preparation programs, and recruit districts and schools, collect student rosters, and administer a baseline student achievement test for an experimental study of the effect on student learning of teachers who have experienced certain types of clinical practice features within university-based preparation programs. The objective of this study is to use causal methods to examine the effectiveness of certain university-based clinical practice features for novice teachers. Teachers who have experienced certain types of clinical practice features and who have completed those features are hypothesized to produce higher average student test scores than teachers who have not done so. Using a randomized controlled trial, students will be randomly assigned to a pair of teachers in the same school and grade level, one of whom will have experienced the type of clinical practice of interest (“treatment”) while the other will not have experienced the feature (“control”). Average test scores of the two groups will then be compared. The Phase I—Recruitment ICR entails the identification of recently-hired teacher pairs who meet the study’s eligibility requirements. The study will use a multi-step process to identify these teachers, including identifying feasible states for the study, selecting the specific features related to clinical practice (i.e., the “program”), identifying university-based teacher preparation programs that require such clinical practice, identifying feasible districts and schools for the study, and finally, confirming eligibility of potential teachers for the study. The Phase I—Recruitment ICR requests approval to collect information from preparation programs about their requirements, focusing on aspects of clinical practice specifically, and to collect preliminary information from teachers about their training to determine their eligibility for the study. This package also provides an overview of the study, including its design and data collection procedures.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that Federal agencies provide interested parties an early opportunity to comment on information collection requests. The Director, Information Collection Clearance Division, Privacy, Information and Records Management Services, Office of Management, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

SUPPLEMENTARY INFORMATION: Under section 6(c) of the Act, 20 U.S.C. 107d–2(c), the Secretary publishes in the Federal Register a synopsis of each arbitration panel decision affecting the administration of vending facilities on Federal and other property.

Background

The Oregon Commission for the Blind (Complainant) alleged the United States Department of Veterans Affairs (DVA) violated the Act and its implementing regulations in 34 CFR part 395 when it denied Complainant’s February 5, 2009, permit application to operate vending machines at the Southern Oregon Rehabilitation Center and Clinic (Clinic) in White City, Oregon.

On September 28, 2009, Complainant contacted the DVA requesting that it
process Complainant’s permit application. On December 9, 2009, DVA’s Regional Counsel denied Complainant’s request to process the permit application. The DVA’s position was that it properly denied the Complainant’s application for two reasons. One, the Clinic did not support a vending facility because of its scattered buildings, and two, the DVA was not obligated to ensure the Clinic supported a vending facility. Specifically, the DVA’s position was that the regulations requiring a satisfactory site or sites for the location and operation of a vending facility by a blind vendor under certain circumstances did not apply to the Clinic because the DVA has operated the clinic since 1949 and its buildings contain fewer than 15,000 square feet of interior space and house less than 100 Federal employees during normal working hours.

Complainant filed a request for Federal arbitration with the Department. A hearing on the matter was held on April 13 and 14, 2011. The issue as determined by the arbitration panel was “whether the Department of Veterans Affairs violated the Randolph-Sheppard Act by denying the request to process the permit application of the Oregon Commission for the Blind for a permit to operate the Clinic vending machines.”

Arbitration Panel Decision

After reviewing all of the testimony and evidence, the panel found that the Clinic is a single facility and that its vending machines are part and parcel of that facility. The panel noted that the parties’ differing interpretations stem from the fact that regulations in 34 CFR, part 395, do not specifically address a State licensing agency’s (SLA’s) permit application covering a building that was not new or renovated after January 1, 1975. The panel determined that, in cases of statutory ambiguity, “regulations must be interpreted in a way that will serve the objectives of the statute and reasonably be consistent with the statute.”

The panel first determined that the purpose of the Act clearly is to enlarge economic opportunities of the blind. The panel then recognized that section 395.31 of the regulations attempts to implement this statutory purpose through the satisfactory site requirements. The panel also considered the last sentence in 395.31(e) to be relevant, although it did not apply directly to the facts in this case. This section provides that nothing in section 395.31 precludes an SLA and a Federal property managing department from agreeing to a vending facility even if the site does not meet minimum requirements under the satisfactory site provisions.

The panel found that the DVA’s position of strictly interpreting the regulations “contradicts section 107 [of the Act] by restricting and thwarting opportunities for the blind.” Accordingly, the panel found that: (1) The priority provisions of the Randolph-Sheppard Act applied to the Clinic; (2) The DVA improperly denied Complainant’s application for a permit to operate vending machines at the Clinic; and (3) the existing Clinic vending machines are not exempted from the Award and Order.

One panel member dissented. This panel member found that the Clinic buildings constructed or substantially modified after January 1, 1975, are exempt from the Randolph-Sheppard Act by application of the minimum standards of 34 CFR 395.31(d). This panel member also determined that the remaining Clinic buildings existing on January 1, 1975, that were not substantially renovated since that date are exempt from the priority provisions of the Act. Thus, the DVA was justified in declining Complainant’s application for a permit to place vending machines at the Clinic.

The views and opinions expressed by the panel do not necessarily represent the views and opinions of the Department.
