

rulemaking process. Upon publication of the CFPB's final rulemaking, any final changes would be incorporated into the Federal Reserve's Regulation E information collection, as appropriate. In addition to the DFA amendments, the Federal Reserve proposed (in the NPRM) to extend for three years, without revision, the current Regulation E information collection. The Federal Reserve did not receive any comments on this part of the proposal and therefore will proceed with extending the information collection as proposed.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Announcement of Requirements and Registration for “Discharge Follow-Up Appointment Challenge”

AGENCY: Office of the National Coordinator for Health Information Technology, HHS.

ACTION: Notice.

SUMMARY: The “Discharge Follow-Up Appointment Challenge” challenges software developers to create an easy-to-use web-based tool that will make post-discharge follow-up appointment scheduling a more effective and shared process for care providers, patients and caregivers. In addition, developers will need to articulate a plan for broader adoption at the community level. Submissions can be existing applications, or applications developed specifically for this challenge.

The statutory authority for this challenge competition is Section 105 of the America COMPETES Reauthorization Act of 2010 (Pub. L. 111–358).

DATES: Effective on January 26, 2011.

FOR FURTHER INFORMATION CONTACT: Adam Wong, (202) 720–2866; Wil Yu, (202) 690–5920.

SUPPLEMENTARY INFORMATION:

Subject of Challenge Competition: The Office of the National Coordinator for Health Information Technology (ONC), in collaboration with the *Partnership for Patients*, seeks to support spread and adoption of promising IT-enabled solutions targeting improved care transitions in the “Discharge Follow-Up Appointment Challenge.” Nearly one in five patients from a hospital will be readmitted within 30 days. A large proportion of readmissions can be prevented by improving communications and coordinating care before and after discharge from the hospital.

This challenge is the second in a series of challenges calling attention to care transitions, particularly the time a patient is discharged from a hospital; these challenges are seeking development and spread of IT-enabled tools that will achieve better care and better health at lower cost. The first challenge, “Ensuring Safe Transitions from Hospital to Home,” called upon

developers to create a web-based application that could empower patients and caregivers to better navigate and manage a transition from a hospital.

Research has shown that scheduling follow-up appointments and post-discharge testing before a patient is discharged, with input and engagement from patients and caregivers, is one of the critical elements of a safe and effective transition. While an increasing number of organizations have adopted this best practice, most patients across the country continue to leave the hospital without confirmed appointments and many providers remain frustrated by a highly manual and unreliable system.

Hospitals with IT-enabled scheduling processes for follow-up appointments often benefit from being in a delivery system where a single scheduling system is shared across many care settings and providers. A growing number of innovative consumer-facing tools are becoming available for patients and care givers to schedule appointments and rate providers. However these tools have not yet reached high levels of adoption within communities, and haven’t to date targeted the appointment scheduling needs of patients, caregivers and providers at the point of discharge from a hospital.

The ideal application for will include the following components: Easy to navigate user interface, easy to navigate process for downstream accepting providers, information for patient and caregiver convenience and preference, critical background information for downstream providers, messaging capabilities to minimize no-shows and cancellations, and EHR interface capabilities where applicable.

To anticipate the needs of a test bed organization or community, successful applicants will also need to formally address the following pilot implementation considerations: estimated timeline for testing and pilot completion, description of ideal pilot environment, estimated resources needed for pilot, metrics to monitor pilot success, and proposed budget for a three-day site visit to support pilot development.

Eligibility Rules for Participating in the Competition:

To be eligible to win a prize under this challenge, an individual or entity:

(1) Shall have registered to participate in the competition under the rules promulgated by Office of the National Coordinator for Health Information Technology;
