Abstract

The Country Exposure Report (FFIEC 009) is filed quarterly with the agencies and provides information on international claims of U.S. banks, savings associations, and bank holding companies that is used for supervisory and analytical purposes. The information is used to monitor country exposure of banks to determine the degree of risk in their portfolios and the possible impact on U.S. banks of adverse developments in particular countries. The Country Exposure Information Report (FFIEC 009a) is a supplement to the FFIEC 009 and provides publicly available information on material foreign country exposures (all exposures to a country in excess of 1 percent of total assets or 20 percent of capital, whichever is less) of U.S. banks, savings associations and bank holding companies that file the FFIEC 009 report. As part of the Country Exposure Information Report, reporting institutions must also furnish a list of countries in which they have lending exposures above 0.75 percent of total assets or 15 percent of total capital, whichever is less.

Current Actions

The agencies are not planning any revisions at this time. However, the agencies expect to propose revisions in the near future, including potential changes to the Country Codes used in the FFIEC 009 report in order to more closely match the Country Codes on the Department of the Treasury's Treasury International Capital (TIC) reports (OMB Nos.: 1505-0016, 0017, 0018, 0019, 0020, and 0024).
