

D. ETS2 is fully deployed; ETS task order closed.

An MOU template will be available within 15 business days of the date of this Bulletin.

Agencies are urged to aggressively pursue transition to ETS2, as anticipated contract extensions will have significantly higher transaction fees for agencies that use them. The GSA Center for Travel Management will assist agencies as they transition to ETS2.

to the OS Paperwork Clearance Officer at the above email address within 60-days.

*Proposed Project:* The Children's Health Insurance Program Reauthorization Act (CHIPRA) Express Lane Eligibility (ELE) Evaluation—OMB No. 0990-NEW—Assistant Secretary Planning and Evaluation (ASPE).

*Abstract:* The Office of the Assistant Secretary for Planning and Evaluation (ASPE) is requesting the Office of Management and Budget (OMB) approval on a new collection to evaluate the implementation of a new policy known as Express Lane Eligibility (ELE). With ELE, a state's Medicaid and/or Children's Health Insurance Program (CHIP) can rely on another agency's eligibility findings to qualify children for health coverage, despite their different methods of assessing income or otherwise determining eligibility.

CHIPRA authorized an extensive, rigorous evaluation of ELE, creating an exceptional opportunity to document ELE implementation across states and to assess the changes to coverage or administrative costs that may have resulted. The evaluation also provides an opportunity to understand other methods of simplified enrollment that states have been pursuing and to assess the benefits and potential costs of these methods compared to those of ELE. To answer key research questions, ASPE will draw on 5 primary data collections including (1) collecting administrative cost data from ELE and non-ELE states, (2) collecting enrollment data from ELE and non-ELE states, (3) conducting case studies in ELE and non-ELE states, including key informant interviews and focus groups, (4) conducting a 51-state (50 states and the District of Columbia) survey, and (5) holding quarterly monitoring calls with 30 states. This request seeks clearance on all data collections except the collection of administrative cost and enrollment data for ELE states. The administrative cost data, enrollment data, case studies, and 51-state survey will take place only once over the course of the two year evaluation. The quarterly monitoring calls will take place take place 5 times over the course of the 13 months and will include an initial call of up to an hour in length and 4 shorter follow-up calls of about 15 minutes in length each. The administrative cost and enrollment data collection includes contact with key informants and state-level computer programmers and will be collected using Microsoft document templates. The qualitative case studies will include site visit interviews with state and local-level key informants in 8 ELE states and 6 non-ELE states, plus focus groups with
