Background: Consumer Confidence Reports are a key part of the public's right-to-know as established in the 1996 Amendments to the Safe Drinking Water Act (SDWA, section 1414(c)). The Consumer Confidence Report, or CCR, is an annual water quality report that a community water system is required by Federal regulations (63 FR 44511, August 19, 1998) to provide to its customers each year. Community water systems (CWSs) serving 10,000 or more persons are required to mail or otherwise directly deliver these reports. States may allow CWSs serving fewer than 10,000 persons to provide these reports by other means. The report lists the regulated contaminants found in the drinking water, as well as health effects information related to violations of the drinking water standards. More information on CCRs can be accessed on EPA's Web site at <http://water.epa.gov/lawsregs/rulesregs/sdwa/ccr/index.cfm>.

In August 2011, the Environmental Protection Agency (EPA) finalized its *Improving Our Regulations: Final Plan for Periodic Retrospective Reviews of Existing Regulations* in response to E.O. 13563. Since 1998, when the CCR rule was finalized, the communication of information and the speed with which information can be shared have greatly expanded, along with a corresponding increase in the diversity of communication tools. The EPA included the CCR rule in its retrospective review plan to explore ways to promote greater transparency

and public participation in protecting the nation's drinking water. The agency's CCR retrospective review will look for opportunities to improve the effectiveness of communicating drinking water information to the public, while lowering the burden on water systems and States. One example suggested by water systems is to allow electronic delivery through email, thereby reducing mailing charges. As EPA evaluates alternative delivery options and other opportunities to improve communication with consumers, the agency will consider impacts on consumer burden, environmental justice, and State implementation. By improving communication, customers are better prepared to make informed decisions and the readership of CCRs also may increase.

Director, Office of Ground Water and Drinking Water.

SUPPLEMENTARY INFORMATION:

Background

On November 29, 2011, PHMSA issued a notice of proposed rulemaking (NPRM) that would make miscellaneous amendments to the pipeline safety regulations (76 FR 73570). On January 12, 2012, the Interstate Natural Gas Association of America requested an extension of the comment period for that NPRM. On January 20, 2012, the Committee on Pipe and Tube Imports Ad Hoc Large Diameter Line Pipe Producers Group Transportation Subcommittee also requested an extension of the comment period to further review a National Transportation Safety Board (NTSB) recommendation that would impact guidelines on the transportation of pipe. PHMSA believes that extension of the comment period is warranted based on the information

provided in these requests. Therefore, PHMSA has extended the comment period from February 3, 2012 to March 6, 2012.

Issued in Washington, DC, on January 30, 2012.
