SUPPLEMENTARY INFORMATION:

- I. Background
- II. Analysis of State Submittals
- III. Final Action
- IV. Statutory and Executive Order Reviews

I. Background

On July 18, 1997 (62 FR 36852), EPA established an annual PM_{2.5} NAAQS at 15.0 micrograms per cubic meter (µg/m³) based on a 3-year average of annual mean PM_{2.5} concentrations. On January 5, 2005 (70 FR 944), EPA published its air quality designations and classifications for the 1997 annual PM_{2.5} NAAQS based upon air quality monitoring data for calendar years 2001–2003. These designations became effective on April 5, 2005. The Chattanooga Area (which is comprised of a portion of Jackson County in Alabama, Catoosa and Walker Counties in Georgia and Hamilton County in Tennessee) was designated nonattainment for the 1997 annual PM_{2.5} NAAQS. See 40 CFR 81.311.

Designation of an area as nonattainment starts the process for a state to develop and submit to EPA a SIP under title 1, part D of the CAA. This SIP must include, among other elements, a demonstration of how the NAAQS will be attained in the nonattainment area as expeditiously as practicable but no later than the date

required by the CAA. Under CAA section 172(b), a state has up to three years after an area’s designation as nonattainment to submit its SIP to EPA. For the 1997 PM_{2.5} NAAQS, these SIPs were due April 5, 2008. See 40 CFR 51.1002(a).

On July 31, 2009, October 27, 2009, and October 15, 2009, Alabama, Georgia and Tennessee (respectively) submitted attainment demonstrations and associated reasonably available control measures (RACM), reasonable further progress (RFP) plans, contingency measures, a 2002 base year emissions inventory and other planning SIP revisions related to attainment of the 1997 annual PM_{2.5} NAAQS in the Chattanooga Area. On May 31, 2011 (76 FR 31239), EPA determined that the Chattanooga Area attained the 1997 annual average PM_{2.5} NAAQS. The determination of attainment was based upon complete, quality-assured and certified ambient air monitoring data for the 2007–2009 period, showing that the Area had monitored attainment of the 1997 annual PM_{2.5} NAAQS. The requirements for the Area to submit an attainment demonstration and associated RACM, RFP plan, contingency measures, and other planning SIP revisions related to attainment of the standard were suspended as a result of the determination of attainment, so long as the Area continues to attain the 1997 annual PM_{2.5} NAAQS. See 40 CFR 51.1004(c).

On June 29, 2011, Georgia withdrew¹ its Chattanooga attainment plan as allowed by 40 CFR 51.1004(c); however, such withdrawal does not suspend the emissions inventory requirement found in CAA section 172(c)(3). Section 172(c)(3) of the CAA requires submission and approval of a comprehensive, accurate, and current inventory of actual emissions. EPA is now approving the emissions inventory portion of the SIP revisions submitted on July 31, 2009, October 27, 2009 and October 15, 2009, by Alabama, Georgia and Tennessee (respectively), as required by section 172(c)(3).

II. Analysis of State Submittals

As discussed above, section 172(c)(3) of the CAA requires areas to submit a comprehensive, accurate and current inventory of actual emissions from all sources of the relevant pollutant or pollutants in such area. Alabama,

¹ Per phone conversation between Lynorae Benjamin (EPA Region 4) and Jimmy Johnson (Georgia Department of Natural Resources) on October 17, 2011, the withdrawal notice did not include the emissions inventory portion of the submittal.

Georgia and Tennessee selected 2002 as base year for their emissions inventory per 40 CFR 51.1008(b). Emissions contained in the Chattanooga emissions inventory cover the general source categories of point sources, non-road mobile sources, area sources, on-road

mobile sources, and biogenic sources. A detailed discussion of the emissions inventory development can be found in Section 4 of the Alabama submittal, Appendix H of the Georgia submittal, and Appendix 4 of the Tennessee

submittal. A summary is also provided below.

The tables below provide a summary of the annual 2002 emissions of nitrogen oxides (NO_x), sulfur dioxide (SO₂) and PM_{2.5}.

The 172(c)(3) emissions inventory is developed by the incorporation of data from multiple sources. States were required to develop and submit to EPA a triennial emissions inventory according to the Consolidated Emissions Reporting Rule for all source categories (i.e., point, area, nonroad mobile and on-road mobile). This inventory often forms the basis of data that are updated with more recent information and data that also are used in the attainment demonstration modeling inventory. Such was the case in the development of the 2002 emissions inventory that was submitted in each State's attainment SIPs for this Area. The 2002 emissions inventory was based on data developed with the Visibility Improvement State and Tribal Association of the Southeast (VISTAS) contractors and submitted by the States to the 2002 National Emissions Inventory. Several iterations of the 2002 inventories were developed for the different emissions source categories resulting from revisions and updates to the data. This resulted in the use of version G2 of the updated data to represent the point sources' emissions.

Data from many databases, studies and models (e.g., Vehicle Miles Traveled, fuel programs, the NONROAD 2002 model data for commercial marine vessels, locomotives and Clean Air Market Division, etc.) resulted in the inventory submitted in these SIPs. The data were developed according to current EPA emissions inventory guidance "Emissions Inventory Guidance for Implementation of Ozone and Particulate Matter National Ambient Air Quality Standards (NAAQS) and Regional Haze Regulations" (August 2005) and a quality assurance project plan that was developed through VISTAS and approved by EPA. EPA agrees that the process used to develop these inventories was adequate to meet the requirements of CAA 172(c)(3) and the implementing regulations.

EPA has reviewed the emissions inventories from Alabama, Georgia and Tennessee, and finds that they are adequate for the purposes of meeting section 172(c)(3) emissions inventory requirement for the 1997 annual PM_{2.5} standard. The emissions inventories are approvable because the emissions were developed consistent with the CAA,

implementing regulations and EPA guidance for emission inventories.

III. Final Action

EPA is approving the 2002 base year emissions inventory portion of the SIP revisions submitted by: the State of Alabama on July 31, 2009, the State of Georgia on October 27, 2009 and the State of Tennessee on October 15, 2009. This action is being taken pursuant to section 110 of the CAA. EPA is publishing this rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. However, in the proposed rules section of this **Federal Register** publication, EPA is publishing a separate document that will serve as the proposal to approve the SIP revision should adverse comments be filed. This rule will be effective April 9, 2012 without further notice unless the Agency receives adverse comments by March 9, 2012.

If EPA receives such comments, then EPA will publish a document withdrawing the final rule and informing the public that the rule will not take effect. All public comments received will then be addressed in a

subsequent final rule based on the proposed rule. EPA will not institute a second comment period. Parties interested in commenting should do so at this time. If no such comments are received, the public is advised that this rule will be effective on April 9, 2012 and no further action will be taken on the proposed rule.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or

safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by April 9, 2012. Filing a petition

for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section of today's **Federal Register**, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

Bacillus thuringiensis Cry2Ae Protein in Cotton; Exemption from the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of *Bacillus thuringiensis* Cry2Ae protein in or on the food and feed commodities of cotton; cotton, undelinted seed; cotton, gin byproducts; cotton, forage; cotton, hay; cotton, hulls; cotton, meal; and cotton, refined oil, when used as a plant-incorporated protectant (PIP) in cotton. Bayer CropScience LP submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting an exemption from the requirement of a tolerance.
