**SUPPLEMENTARY INFORMATION:** The U.S. Department of Agriculture (USDA) is currently undertaking a variety of efforts to transform itself into a customer-focused, high-performing organization. In this context, USDA's Animal and Plant Health Inspection Service (APHIS) is focusing on ways to share timely information with its stakeholders and communicate the value APHIS places on our many and diverse stakeholder relationships.

As part of a larger effort to enhance stakeholder communication, APHIS is hosting an open meeting with all interested stakeholders to talk about the Agency's budget, process improvement efforts, and modernization initiatives and to provide stakeholders with an opportunity to share their thoughts on partnerships and the Agency's critical services. While we welcome comments and feedback on all aspects of APHIS-stakeholder partnerships and the Agency's critical services, we are particularly interested in our stakeholders' thoughts on the topics discussed below.

In this era of shrinking budgets, Federal Agencies are facing hard choices about the delivery of important services, and APHIS is no exception. Some decisions have already been made with respect to our programs, and we anticipate more difficult choices will be required in the future. This means that it will be more important than ever for APHIS to understand its stakeholders' concerns and priorities.

1. As we take stock of our current programs and services and consider where, if necessary, there should be strategic cuts or across-the-board reductions, we are interested in hearing from stakeholders about those APHIS activities you most value and where and how you think the Agency might make responsible changes.

- In your opinion, what are the three to five most essential services APHIS provides and why?

- Please share any feedback regarding how you feel we can best structure or provide these services.

- When you or your members seek APHIS' assistance, do you primarily rely on our local field offices, State offices, regional offices, research centers and field stations, or headquarters for support? Why?

- As we continue to look at ways to improve our processes and enhance customer service, what recommendations do you have for specific efforts we could undertake in 2012?

2. Given limited resources, APHIS is seeking new ways to enhance existing partnerships and build new ones.

- How might we strengthen current partnerships or collaborate in new ways to accomplish critical mission activities?

- Do you see opportunities for APHIS, State governments, tribes, industry and academia to redefine traditional roles to find efficiencies or improvements in the way we collectively safeguard American agriculture? As best you can, please be specific or provide examples.

3. Please provide any additional comments or feedback you would like to share with APHIS' leadership, especially as it relates to how you like to see APHIS management communicate with you at the local, regional, and national level. Please be specific.
