

mother-infant pairs that have reported associations with birth outcomes, childhood neurobehavioral and neurodevelopment outcomes in the offspring when evaluated in neonates, infants, and young children.

In 2008, the FIFRA Scientific Advisory Panel (SAP) reviewed a draft science issue paper on the human health effects of chlorpyrifos which provided a preliminary review of the scientific literature on experimental toxicology and epidemiology studies available at that time. In 2010, the Agency developed a draft "Framework for Incorporating Human Epidemiologic & Incident Data in Health Risk Assessment" which provides the conceptual foundation for evaluating multiple lines of scientific evidence in the context of the understanding of the adverse outcome pathway (or mode of action). This draft framework uses modified Bradford Hill Criteria to evaluate the sufficiency of evidence to establish key events within a mode of action(s) and explicitly considers such concepts as strength, consistency, dose response, temporal concordance and biological plausibility. Since the 2008 SAP on chlorpyrifos, the Agency has performed further analyses on the existing and new epidemiology results in mothers and children, available biomonitoring data, and experimental toxicology studies evaluating proposed adverse outcome pathways in the context of human health risk assessment. Specifically, the Agency is evaluating available literature on the potential for chlorpyrifos to cause long term adverse effects from early life exposure, *in vivo* and *in vitro* studies evaluating mechanistic aspects of chlorpyrifos, and the potential for adverse effects below doses established from ChE inhibition that are used for regulatory purposes. At this time, the Agency is working towards a weight of evidence evaluation integrating the epidemiology studies with the experimental toxicology studies for the neurodevelopmental outcomes. This analysis is complex and multifaceted as it involves different lines of scientific evidence (i.e., *in vivo* and *in vitro* experimental toxicology studies, explicit consideration of adverse outcome pathways, exposure, epidemiology, and biomonitoring data). As such, the Agency believes that peer review on the status of the current analysis is important.

C. FIFRA SAP Documents and Meeting Minutes

EPA's background paper, related supporting materials, charge/questions to FIFRA SAP, FIFRA SAP composition

(i.e., members and ad hoc members for this meeting), and the meeting agenda will be available by approximately mid-March. In addition, the Agency may provide additional background documents as the materials become available. You may obtain electronic copies of these documents, and certain other related documents that might be available electronically, at <http://www.regulations.gov> and the FIFRA SAP homepage at <http://www.epa.gov/scipoly/sap>.

FIFRA SAP will prepare meeting minutes summarizing its recommendations to the Agency approximately 90 days after the meeting. The meeting minutes will be posted on the FIFRA SAP Web site or may be obtained from the OPP Regulatory Public Docket at <http://www.regulations.gov>.

NACEPT members represent academia, industry, non-governmental organizations, and

local, state, and tribal governments. The purpose of this meeting is to begin developing recommendations to the Administrator regarding actions that EPA can take in response to the National Academy of Sciences Report on "Incorporating Sustainability in the U.S. Environmental Protection Agency." A copy of the agenda for the meeting will be posted at <http://www.epa.gov/officeofpolicy/nacept/cal-nacept.htm>.

DATES: NACEPT has cancelled the two-day public meeting scheduled for February 13, 2012, from February 14, 2012. NACEPT will now hold the two-day public meeting on Monday, March 26, 2012, from 9 a.m. to 5:30 p.m. (EST) and Tuesday, March 27, 2012 from 8:30 a.m. to 2 p.m. (EST).
