

Estimated Total Annual Hourly Burden to Respondents: 211 hours (422 responses × 0.5 hour per response).

Title: Facility License Standards.

OMB Control Number: 3141-0012.

Background: IGRA states that “a separate license issued by the Indian tribe shall be required for each place, facility, or location on Indian lands at which class II [and class III] gaming is conducted.” 25 U.S.C. 2710(b)(1) and (d)(1)(A)(iii). Further, IGRA requires “the construction and maintenance of the gaming facilities, and the operation of that gaming is conducted in a manner which adequately protects the environment and public health and safety.” 25 U.S.C. 2710(b)(2)(E).

NIGC regulations, part 559 requires that a tribe submit a notice to the NIGC that it is considering issuing a facility license, including applicable Indian lands information, at least 120 days before a new class II and/or class III gaming facility is opened. The amount of Indian lands information depends, in part, on whether the Bureau of Indian Affairs maintains the necessary records. The Indian lands information will continue to be utilized by the NIGC to ensure that its records are complete for internal purposes, such as assessing the NIGC’s jurisdiction to regulate the gaming on the parcel, as well as responding to inquiries from government agencies and Congress as to the statuses of lands where Indian gaming is proposed or occurring.

Part 559 also requires that tribes submit copies of each newly issued or renewed facility license to the NIGC within 30 days of issuance, as well as notices of facility closures. This information will enable the NIGC to maintain accurate, up-to-date records of the Indian gaming facilities that are operating on Indian lands in the United States at any given point in time. Currently, facility licenses must be renewed every three years. With each new facility license, the Tribe must submit an attestation that it has identified and enforces environment and public health and safety laws and that the tribe is in compliance with those laws. Part 559 also requires tribes to submit a document listing all environmental and public safety laws, resolutions, codes, policies and standards applicable to its gaming facility. If the submitted laws, resolutions, etc. do not change, the tribe need only certify that fact when submitting a renewed facility license. Finally, the NIGC Chair has the discretion to request environmental and public health and safety documentation on occasions when there is an identified, substantial concern. Through

these submissions, the NIGC can ensure that the tribes have determined that the construction, maintenance, and operation of their gaming facilities are conducted in a manner that adequately protects the environment and the public health and safety.

This information collection serves two purposes: (i) to receive up-to-date information from tribes regarding the number of licensed Indian gaming facilities and the Indian lands status of the site of each gaming facility; and (ii) to obtain certifications from the tribes that the construction, maintenance, and operation of the gaming facilities are conducted in a manner that adequately protects the environment and the public health and safety.

Brief Description of Collection: This collection is mandatory and enables the NIGC to conduct its statutory duty to regulate Indian gaming by ensuring that tribal gaming facilities are properly licensed by the tribes.

Title: Lower Colorado River Well Inventory.

OMB Control Number: 1006-0014.

Abstract: Pursuant to the Boulder Canyon Project Act (Pub. L. 70-642, 45 Stat. 1057), all diversions of mainstream Colorado River water must be in accordance with a Colorado River water entitlement. The Consolidated Decree of the United States Supreme Court in *Arizona v. California*, 547 U.S. 150 (2006) requires the Secretary of the Interior to account for all diversions of mainstream Colorado River water along the lower Colorado River, including water drawn from the mainstream by underground pumping. To meet the water entitlement and accounting obligations, an inventory of wells and river pumps is required along the lower Colorado River, and the gathering of specific information concerning these wells.

Description of respondents: The respondents will include well and river-pump owners and operators along the lower Colorado River in Arizona, California, and Nevada. Each diverter (including well pumpers) must be identified and their diversion locations and water use determined.

Frequency: These data are collected only once for each well or river-pump owner or operator as long as changes in water use, or other changes that would impact contractual or administrative requirements, are not made. A respondent may request that the data for its well or river pump be updated after the initial inventory.

Estimated completion time: An average of 20 minutes is required to interview individual well and river-pump owners or operators. Reclamation will use the information collected during these interviews to complete the information collection form.

Estimated Total Number of Respondents: 1,500.

Estimated Number of Responses per Respondent: 1.0.

Estimated Total of Annual Responses: 1,500.

Estimated Total Annual Burden Hours on Respondents: 500 hours.
