**Title:** NESHAP for Petroleum Refineries (Renewal).

**ICR Numbers:** EPA ICR Numbers 1692.07, OMB Control Number 2060-0340.

**ICR Status:** This ICR is scheduled to expire on February 29, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Petroleum Refineries (40 CFR part 63, subpart CC) were proposed on July 15, 1994, promulgated on August 18, 1995, and most recently amended on October 28, 2009. These regulations apply to the following existing and new petroleum refining process units and emission points located at refineries that are major sources of hazardous air pollutants (HAPs): Miscellaneous process vents, storage vessels, wastewater streams and treatment operations, equipment leaks, gasoline loading racks, and marine vessel loading operations. These regulations also apply to storage vessels and equipment leaks associated with bulk gasoline terminals or pipeline breakout stations that are related to an affected petroleum refinery. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart CC.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all sources subject to NESHAP. In addition,

respondents are required to comply with the recordkeeping and reporting requirements contained in the following rules: Either 40 CFR part 61, subpart VV or 40 CFR part 63, subpart H for equipment leaks (which includes an initial report and semiannual summaries of leak detection and repair); 40 CFR part 61, subpart FF for wastewater operations; portions of 40 CFR part 63, subpart R for gasoline loading racks; and 40 CFR part 63, subpart Y for marine tank vessel loading operations.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart CC, as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for the EPA regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 315 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Petroleum refineries plants.

**Estimated Number of Respondents:** 153.

**Frequency of Response:** Annually, semiannually, occasionally, and quarterly.

**Estimated Total Annual Hour Burden:** 511,064 hours.

**Estimated Total Annual Costs:** There are \$62,671,642, which includes \$60,288,291 in labor costs, \$2,321,640 in annualized capital/startup costs, and \$61,711 in operation and maintenance (O&M) costs.

**Changes in the Estimates:** The increase in labor burden and cost to industry compared to the most recently approved ICR is due to several considerations. Firstly, burden from the recent ICR amendments, including the monthly sampling program and reporting and recordkeeping requirements for heat exchange systems, are incorporated into the overall estimate for this renewal ICR. This resulted in an increase in labor hours, as well as capital/startup costs and operation and maintenance (O&M) costs. Secondly, labor rates are updated to be consistent with the most recent available data from the Bureau of Labor Statistics.

There is also an increase in burden hours and costs to the Agency. Similarly, this is due to a program change, as well as the most updated labor rates.

The combining of the previous ICR with EPA ICR number 2334.02, has attributed also to the increase in burden hours and costs.
