FOR FURTHER INFORMATION CONTACT: Amy Hapeman or Kristy Beard, (301) 427-8401.

SUPPLEMENTARY INFORMATION: On June 27, 2011, notice was published in the *Federal Register* (76 FR 37327) that a request for a scientific research permit to take loggerhead, green, Kemp's ridley, olive ridley, leatherback, and hawksbill sea turtles had been submitted by the above-named organization. The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The SEFSC is authorized to conduct research on leatherback, loggerhead, green, hawksbill, olive ridley, and Kemp's ridley sea turtles in the Atlantic Ocean, Gulf of Mexico, Caribbean Sea and their estuarine and coastal environments. The purpose of the research is to evaluate modifications to commercial fishing gear to mitigate sea turtle interactions and capture. The permit authorizes animals to be captured during trawl surveys and to handle and sample turtles captured within fisheries managed by another Federal authority. All animals would be handled, measured, weighed, photographed, flipper tagged, passive integrated transponder tagged, and skin biopsied prior to release. A limited number of mortalities may occur due to trawling. The permit is valid for five years.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the

disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: February 17, 2012.

P. Michael Payne,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
