

disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 152.

Frequency of response: On occasion.

Estimated total annual burden hours: 11,215 hours.

Estimated total annual costs: \$ (in thousands of dollars): \$1,577,659, which includes \$936,491 annualized capital or O&M costs.

Are there changes in the estimates from the last approval?

There is no change of hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This reflects EPA's estimate that the recent trend of the number of C&D landfills has stabilized at the current level.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: February 15, 2012.

Suzanne Rudzinski,

Director, Office of Resource Conservation and Recovery.

Title: NESHAP for Source Categories: Generic Maximum Achievable Control Technology Standards for Carbon Black, Ethylene, Cyanide and Spandex (Renewal).

ICR Numbers: EPA ICR Number 1983.06, OMB Control Number 2060-0489.

ICR Status: This ICR is scheduled to expire on March 31, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for the EPA regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the General Provisions specified at 40 CFR part 63, subpart YY.

Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart YY, as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 90 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Source categories: generic maximum achievable control technology standards for carbon black, ethylene, cyanide and spandex facilities.

Estimated Number of Respondents: 72.

Frequency of Response: Annually, semiannually, and occasionally.

Estimated Total Annual Hour Burden: 13,524.

Estimated Total Annual Cost: \$1,654,836, which includes \$1,295,805 in labor costs, no capital/startup costs,

and \$359,031 in operation and maintenance (O&M) costs.

Changes in the Estimates: The increase in burden from the most recently approved ICR is due to adjustments. The adjustment increase in burden costs for both the respondents and the Agency is due to an update in labor rates. Despite the increase in burden costs, there is a decrease in the respondent labor hours (9 hours) in this ICR compared to the previous ICR due to a mathematical error in determining the person-hours per respondent.

John Moses,

Director, Collection Strategies Division.
