Approval, Disapproval and Promulgation of Implementation Plans; Nebraska; Regional Haze State Implementation Plan; Federal Implementation Plan for Best Available Retrofit Technology Determination

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to partially approve and partially disapprove a revision to the Nebraska State Implementation Plan (SIP) submitted by the State of Nebraska through the Nebraska Department of Environmental Quality (NDEQ) on July 13, 2011 that addresses regional haze for the first implementation period. This revision was submitted to address the requirements of the Clean Air Act (CAA or Act) and our rules that require States to prevent any future and remedy any existing man-made impairment of visibility in mandatory Class I areas caused by emissions of air pollutants from numerous sources located over a wide geographic area (also referred to as the "regional haze program"). States are required to ensure reasonable progress toward the national goal of achieving natural visibility conditions in Class I areas. EPA is proposing to approve a portion of this SIP revision as meeting certain requirements of the regional haze program and to partially approve and partially disapprove those portions addressing the requirements for best

available retrofit technology (BART) and the long-term strategy (LTS). EPA is proposing a Federal Implementation Plan (FIP) relying on the Transport Rule to satisfy BART for sulfur dioxide (SO₂) at one source to address these issues.
