this is intended to be used, that was being manufactured in the United States at the time of order. Reasons: This instrument is unique in that it combines the sensitivity, long life, and reproducibility of thermopile sensors with a large internal working volume capable of containing the molten oxide solvents used for calorimetry and operating in the range 700–1000 degrees Celsius where such solvents are molten. Conventional differential scanning calorimeters, made by other companies, are completely different in design and do not feature the large sample volume surrounded by a sensitive detector that is essential for solution calorimetry.

Docket Number: 12–001. Applicant: The Regents of the University of California, Lawrence Berkeley National Laboratory, 1 Cyclotron Road M/S 71R0259, Berkeley, CA 94720. Instrument: Berkeley Lab Laser Accelerator “BELLA” 1.3 petawatt laser system. Manufacturer: Thales Optronique S.A., France. Intended Use: See notice at 77 FR 5768, February 6, 2012. Comments: None received. Decision: Approved. We know of no instruments of equivalent scientific value to the foreign instruments described below, for such purposes as this is intended to be used, that was being manufactured in the United States at the time of order. Reasons: Requirements of this system include that it is characterized by a short pulse, high intensity, Ti:sapphire laser able to demonstrate a 10 GeV laser-plasma accelerator module with a pulse energy of 40 Joules on target and a pulse duration of <40 femtoseconds at optimum compression with a repetition rate of 1 Hz ± 5%.

Dated: March 5, 2012. Gregory W. Campbell, Director, Subsidies Enforcement Office, Import Administration.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Gear-Marking Requirement for Atlantic Large Whale Take Reduction Plan

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before May 11, 2012.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at jjessup@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Kate Swails, (978) 282–8481 or Kate.Swails@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection.

The purpose of this collection of information is to enable National Marine Fisheries Service (NMFS) to reduce the serious injury and mortality of large whales, especially right whales, due to incidental entanglement in the United States (U.S.) commercial fishing gear. Any persons setting trap/pot of gillnet gear in some areas of the Atlantic Ocean are required to paint or otherwise mark their gear with one or two color codes, designating the type of gear and area where the gear is set. The surface buoys of this gear need to be marked to identify the vessel or fishery. These marking requirements apply in the various management areas under the Atlantic Large Whale Take Reduction Plan (ALWTRP), developed under the authority of the Marine Mammal Protection Act.

The goals of this collection of information are to obtain more information on where large whales are being entangled and on what type of gear is responsible for the entanglement. This information will allow NMFS to focus further risk reduction measures in certain areas or fisheries, where needed, to meet the goals of the ALWTRP. Also, fisheries observers can provide information to managers on whether regulations need to be modified to address compliance or safety issues.

II. Method of Collection

Information collected is in the form of gear marking.

III. Data

OMB Control Number: 0648–0364.
