Abstract: The Automated Commercial Environment (ACE) is a trade processing system that will eventually replace the Automated Commercial System (ACS), the current import system for U.S. Customs and Border Protection (CBP) operations. ACE supports government agencies with border-related missions, as well as the business community, with respect to moving goods across the border efficiently and securely. Once ACE is fully implemented, all related CBP functions and the trade community will be supported from a single common user interface. The CBP transition to ACE began in October 2003 with the launch of the ACE Secure Data Portal, a customized Web page that provides a single, user-friendly gateway to access CBP information via the internet for CBP, the trade community and Participating Government Agencies. In order to participate in the various ACE pilots, companies and/or individuals are required to submit basic information to CBP such as: their name; their employer identification number (EIN) or social security number, standard carrier alpha code (SCAC), and if applicable, a statement certifying their capability to connect to the internet. The application for the ACE Secure Data Portal is accessible at: http://www.cbp.gov/linkhandler/cgov/trade/automated/modernization/ace_app_info/ace_portal_app.ctt/ace_portal_app.pdf.
