History and Description of the Cultural Items

In 1979, cultural items were removed from the Pinnacle Site, site AZ P:14:71(ASM), in Navajo County, AZ, during a legally authorized survey conducted by the University of Arizona Archaeological Field School under the direction of Madeleine Hinkes. A report prepared by Hinkes describes the presence of five unauthorized excavation pits at this site. The items listed below were found with human burials, but the human remains are not present in the collection. There is no record in Arizona State Museum files regarding the accession of these cultural items. However, the collection likely entered the museum in the same year as other collections from the summer field school. The eight unassociated funerary objects are 2 animal bone fragments, 1 ceramic sherd, 4 pieces of chipped stone and 1 chert scraper.

The Pinnacle Site consists of a pueblo of about 10 rooms and dates from A.D. 1275-1400, based on the ceramic assemblage. The ceramic and architectural forms are consistent with the archeologically described Upland Mogollon or prehistoric Western Pueblo traditions.

In 1979, cultural items were removed from an unnamed site, site AZ P:14:281(ASM), in Navajo County, AZ, during a legally authorized survey conducted by the University of Arizona Archaeological Field School under the direction of Madeleine Hinkes. A report prepared by Hinkes describes the presence of at least 70 unauthorized excavation pits at this site. The items were found with human burials, but the human remains are not present in the collection. There is no record in Arizona
