SUPPLEMENTAL INFORMATION:

Title: 30 CFR 250, Subpart J, Pipelines and Pipeline Rights-of-Way.

Form: BSEE–0149.

OMB Control Number: 1014–0016.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 et seq. and 43 U.S.C. 1801 et seq.), authorizes the Secretary of the Interior to prescribe rules and regulations necessary for the administration of the leasing provisions of the Act related to mineral resources on the OCS. Such rules and regulations will apply to all operations conducted under a lease, right-of-way (ROW), or a right-of-use and easement. Section 1334(e) authorizes the Secretary to grant ROWs through the submerged lands of the OCS for pipelines “* * * for the transportation of oil, natural gas, sulphur, or other minerals, or under such regulations and upon such conditions as may be prescribed by the Secretary, * * * including (as provided in section 1347(b) of this title) assuring maximum environmental protection by utilization of the best available and safest technologies, including the safest practices for pipeline burial * * *.”

The Independent Offices Appropriations Act (31 U.S.C. 9701), the Omnibus Appropriations Bill (Pub. L. 104–133, 110 Stat. 1321, April 26, 1996), and OMB Circular A–25, authorize Federal agencies to recover the full cost of services that confer special benefits. This authority and responsibility are among those delegated to BSEE. BSEE regulations specify cost recovery service fees for pipeline and assignment applications. This information collection (IC) request addresses the regulations under 30 CFR 250, subpart J, on pipelines and pipeline ROWs and is considered a revision. Between the initial 60-day FR notice and now, BSEE requested and obtained OMB approval via a Notice of Action (12/12/2011) to transfer 1010–0050 to 1014–0016. This transfer was a result of the Bureau of Ocean Energy Management, Regulations and Enforcement splitting into two bureaus and some specific subpart J regulatory requirements going to both bureaus. Therefore, the program change is due to that final rulemaking (76 FR 64432) where the requirements pertaining to bonding (Form BOEM–2030; § 250.1011) have been removed from BSEE regulations and are now located in the Bureau of Ocean Energy Management regulations (30 CFR 550.1011). This collection also covers the related Notices to Lessees and Operators (NTLs) that BSEE issues to clarify and provide additional guidance on some aspects of the regulations.

Regulations at 30 CFR part 250, subpart J, implement these statutory requirements. We use the information to ensure those activities are performed in a safe manner. BSEE needs information concerning the proposed pipeline and safety equipment, inspections and tests, and natural and manmade hazards near the proposed pipeline route. BSEE uses the information to review pipeline designs prior to approving an application for a ROW or lease term pipeline to ensure that the pipeline, as constructed, will provide safe transportation of oil and gas and other minerals through the submerged lands.
