The product of the Data/ Assessment Workshop is a report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses, and describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency

representatives including fishermen, environmentalists, and NGO’s; International experts; and staff of Councils, Commissions, and state and federal agencies.

SEDAR 29 Assessment webinar series:

The OCNMS Advisory Council was established in December 1998 to assure continued public participation in the management of the sanctuary. Serving in a volunteer capacity, the advisory council's 15 voting members represent a variety of local user groups, as well as the general public. In addition, six Federal government agencies serve as non-voting, ex officio members. Since its establishment, the advisory council has played a vital role in advising OCNMS and NOAA on critical issues. In addition to providing advice on management issues facing the Sanctuary, council members serve as a communication bridge between constituents and OCNMS staff.

SUPPLEMENTARY INFORMATION:

I. Abstract

The United States Patent and Trademark Office (USPTO) is required by 35 U.S.C. 131 to examine an application for patent and, when appropriate, issue a patent. Also, the USPTO is required to publish patent applications, with certain exceptions, promptly after the expiration of a period of eighteen months from the earliest filing date for which a benefit is sought under Title 35, United States Code ("eighteen-month publication"). Certain situations may arise which require that additional information be supplied in order for the USPTO to further process the patent or application. The USPTO administers the statutes through various sections of the rules of practice in 37 CFR Part 1.

The information in this collection can be used by the USPTO to continue the processing of the patent or application to ensure that applicants are complying with the patent regulations and to aid in the prosecution of the application.

Modifications to this collection since the previous renewal include: three requests for non-substantive change; separately accounting for two requirements; the deletion of an item from the collection, and adding electronic equivalents for the majority of the paper forms. The USPTO is also planning to move items out of 0651-0031 into two new collections.

The three requests for non-substantive change include one in August of 2010 making two changes to an existing form (PTOL-413A); and a second in November of 2010 adding a form for an item that was currently approved (Petition to Withdraw an Application
