The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 12.

Frequency of response: Annual or On Occasion.

Estimated total average number of responses for each respondent: 3.

Estimated total annual burden hours: 69.

Estimated total annual costs: \$5,654. This includes an estimated burden cost of \$5,538 and an estimated cost of \$116 for capital investment or maintenance and operational costs.

Docket Number: EPA-HQ-OAR-2004-0060

Affected entities: Entities potentially affected by these actions are manufacturers of nonroad spark-ignition engines, including marine spark ignition engines.

Title: Emissions Certification and Compliance Requirements for Nonroad Spark-Ignition Engines.

EPA ICR Number: 1695.10, OMB Control Number 2060-0338.

Abstract: This ICR is currently scheduled to expire on August 31, 2012. This information collection is requested under the authority of Title II of the Clean Air Act (42 U.S.C. 7521 et seq.). Under this Title, EPA is charged with issuing certificates of conformity for those engines which comply with applicable emission standards. Such a certificate must be issued before engines may be legally introduced into commerce. To apply for a certificate of conformity, manufacturers are required to submit descriptions of their planned production line, including detailed descriptions of the emission control system, and test data. This information is organized by "engine family" groups expected to have similar emission characteristics. The emission values achieved during certification testing may also be used in the Averaging, Banking, and Trading (ABT) Program. The program allows manufacturers to bank credits for engine families that emit below the standard and use the credits for families that emit above the standard. They may also trade banked

credits with other manufacturers. Participation in the ABT program is voluntary. Different categories of spark-ignition engines may also be required to comply with production-line testing and in-use testing. There are also recordkeeping and labeling requirements. In this notice, former ICR 1722.06 ("Emission Certification and Compliance Requirements for Spark-Ignition Marine Engine, OMB Control Number 2060-0321) and portions of former ICR 2251.03 (Control of Emissions from Nonroad Spark-Ignition Engines and Equipment, OMB Control Number 2060-0603) are being incorporated into ICR 1695.10. This action is undertaken to consolidate certification and compliance information requirements for spark-ignition engines into one ICR for simplification. With this consolidation, we combine all the certification and compliance burden associated with the spark-ignition engine industry.

This information is collected electronically by the Gas Engine Compliance Center (GECC), Compliance Division, Office of Transportation and Air Quality (OTAQ), Office of Air and Radiation of the U.S. Environmental Protection Agency. GECC uses this information to ensure that manufacturers are in compliance with applicable regulations and the Clean Air Act (CAA). It may also be used by the Office of Enforcement and Compliance Assurance (OECA) and the Department of Justice for enforcement purposes. Non-Confidential Business Information (CBI) may be disclosed on OTAQ's Web site or upon request under the Freedom of Information Act to trade associations, environmental groups, and the public.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 127 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is under review and briefly summarized here (the following numbers represent consolidated burden for the three combined ICRs):

Estimated total number of potential respondents: 864.

Frequency of response: Annual or On Occasion.

Estimated total average number of responses for each respondent: 3.14.

Estimated total annual burden hours: 345,159.

Estimated total annual costs: \$41,396,380. This includes an estimated burden cost of \$22,146,947 and an estimated cost of \$19,249,433 for capital investment or maintenance and operational costs.

Are there changes in the estimates from the last approval?

To date, there are no changes in the number of hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. However, EPA is still evaluating information that may lead to a change in the estimates.

What is the next step in the process for these ICRs?

EPA will consider the comments received and amend the ICRs as appropriate. The final ICR packages will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT.**

Dated: March 16, 2012.

Byron J. Bunker,

Acting Director, Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation.

Title: Focus Groups as Used by EPA for Economics Projects (Renewal).

ICR numbers: EPA ICR No. 2205.07, OMB Control No. 2090-0028.

ICR Status: This ICR is scheduled to expire on March 31, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The EPA is seeking renewal of a generic information collection request (ICR) for the conduct of focus groups and one-on-one interviews primarily related to survey development for economics projects. Focus groups are groups of individuals brought together for moderated discussions on a specific topic or issue. These groups are typically formed to gain insight and understanding of attitudes and perceptions held by the public surrounding a particular issue. One-on-one interviews, as the term implies, are individual interviews in which a respondent is generally asked to review materials and provide feedback on their content and design as well as the thought processes that the materials invoke.

Focus groups and one-on-one interviews (hereafter referred to

collectively as "focus groups") used as a qualitative research tool have three major purposes:

- To better understand respondents' attitudes, perceptions and emotions in response to specific topics and concepts;
- To obtain respondent information useful for better defining variables and measures in later quantitative studies; and
- To further explore findings obtained from quantitative studies.

Through these focus groups, the Agency will be able to gain a more in-depth understanding of the public's attitudes, beliefs, motivations and feelings regarding specific issues and will provide invaluable information regarding the quality of draft survey instruments. Focus group discussions are necessary and important steps in the design of a quality survey. The target population for the focus group discussions will vary by project, but will generally include members of the general public. Participation in the focus groups will be completely voluntary. Each focus group will fully conform to federal regulations—specifically the Privacy Act of 1974 (5 U.S.C. 552a), the Hawkins-Stafford Amendments of 1988 (Pub. L. 100-297), and the Computer Security Act of 1987.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Individuals.

Estimated Number of Respondents: 2,066 over three years or 689 per year.

Frequency of Response: 1.

Estimated Total Annual Hour Burden: 1,359.

Estimated Total Annual Cost: \$41,394, includes \$0 annualized capital or O&M costs. Changes in the Estimates:

There is an increase of 573 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is based on new estimates provided by the program offices at EPA on their projected use of focus groups.

John Moses,

Director, Collection Strategies Division.
