Draft National Water Program 2012 Strategy: Response to Climate Change

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability and request for comments.

SUMMARY: The Environmental Protection Agency is publishing for public comment a draft long-range strategy that describes how the agency will address climate change challenges to its mission of protecting human health and the

environment. Climate change alters the hydrological background in which EPA's programs function. Depending upon the regional, local and even temporal nature of effects, climate change will pose challenges to various aspects of water resource management, including how to: address risks to drinking water, wastewater and storm water infrastructure; protect quality of surface water, ground water and drinking water; build resilience of watersheds, wetlands, and coastal and ocean waters; and work with tribal communities to understand the implications of climate change to their economy and culture.

SUPPLEMENTARY INFORMATION:

What should I consider as I prepare my comments for EPA?

To remain effective and continue fulfilling its mission, the EPA will need to adapt to already observed and projected changes. To that end, the Agency will continue to collaborate

with partners at the federal, state, tribal, and local levels to develop the requisite information, tools and strategies. The *Draft National Water Program 2012 Strategy: Response to Climate Change (Draft 2012 Strategy)* addresses the challenges climate change poses and lays out a long term vision for the sustainable management of water resources for future generations in light of climate change. The *Draft 2012 Strategy* is intended to be a roadmap to guide future programmatic planning, and inform decision makers during the Agency's annual planning process. It describes the array of actions that should be taken in the coming years to build a climate resilient national water program.

The following questions are intended to solicit input and insight for particular areas of the *Draft 2012 Strategy*. In addition to these questions, reviewers are encouraged to consider their own questions pertinent to their interests.

- Which Clean Water Act and Safe Drinking Water Act program areas do you think are most vulnerable to climate change? Which strategic actions should be prioritized? Are there strategies that are missing or need revision?
- Are there important partnerships that have not been identified?
- Are there examples of methods for measuring and tracking progress and outcomes of adaptation activities? Is the approach described adequate?
- Are there research priorities that were not listed?
- Please supply any additional references addressing the economics of climate change adaptation (e.g., assessing the costs and benefits of climate change adaption projects).
- How can we improve our representation of tribal climate change and water interests? Are there examples of incorporating traditional ecological knowledge involving water resources into climate adaptation science and strategies?

Tips for Preparing Your Comments. When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.

- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

- Provide specific examples to illustrate your concerns, and suggest alternatives.

- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

- Make sure to submit your comments by the comment period deadline identified.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: This notice announces the availability of EPA's progress report in meeting its performance measures and goals for pesticide reregistration during fiscal year 2011.

I. Why is EPA announcing the availability of this report?

The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) requires EPA to publish information about EPA's annual achievements in meeting its performance measures and goals for pesticide reregistration. The report for fiscal year 2011 discusses the integration of tolerance reassessment with the reregistration process, and describes the status of various regulatory activities associated with reregistration and tolerance reassessment. The 2011 report also gives total numbers of products reregistered and products registered under the "fast-track" provisions of FIFRA.
