Agency for Healthcare Research and Quality Agency

Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Agency for Healthcare Research and Quality, HHS.

ACTION: Notice.

SUMMARY: This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) approve the proposed information collection project: “Synthesis of AHRQ–Funded HAI Projects.” In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501–3521, AHRQ invites the public to comment on this proposed information collection.

DATES: Comments on this notice must be received by June 5, 2012.

ADDRESSES: Written comments should be submitted to: Doris Leffcowitz, Reports Clearance Officer, AHRQ, by email at doris.leffcowitz@AHRQ.hhs.gov.

Copies of the proposed collection plans, data collection instruments, and specific details on the estimated burden can be obtained from the AHRQ Reports Clearance Officer.

FOR FURTHER INFORMATION CONTACT: Doris Leffcowitz, AHRQ Reports Clearance Officer, (301) 427–1477, or by email at doris.leffcowitz@AHRQ.hhs.gov.

SUPPLEMENTARY INFORMATION:

Proposed Project

Synthesis of AHRQ–Funded HAI Projects

For approximately a decade, AHRQ has conducted research on preventing healthcare-associated infections (HAIs), both internally and through contracts and grants. AHRQ’s grant- and contract-supported projects have been directed at the major types of HAIs: Central-line-associated bloodstream infections (CLABSI), catheter-associated urinary tract infections (CAUTI), surgical site infections (SSI), ventilator-associated pneumonia (VAP), methicillin-resistant Staphylococcus aureus (MRSA), and Clostridium difficile (C. diff.). Projects have addressed the problem of HAIs in diverse healthcare settings, including hospitals, ambulatory settings (ambulatory surgery centers, end-stage renal disease facilities, and outpatient clinics and offices), and long-term care facilities. AHRQ’s portfolio of HAI projects has emphasized a combination of research and implementation initiatives. In the latter category, a major focus of AHRQ’s efforts has been to deploy tools that can improve provider performance and reduce HAIs. Based on the earlier success of the Michigan Keystone project, AHRQ has funded projects to implement the Comprehensive Unit-based Safety Program (CUSP) to address CLABSI and CAUTI nationwide. Data are now emerging that demonstrate the success of CUSP in reducing CLABSI in hospitals across the nation.

Between 2007 and 2010, AHRQ funded 40 contracts and 18 grants focusing on expanding the knowledge base and implementing HAI prevention strategies. Today it is...
This study is being conducted by AHRQ through its contractor, IMPAQ International, LLC and its subcontractor, the RAND Corporation, pursuant to AHRQ’s statutory authority to conduct and support research and disseminate information on healthcare and on systems for the delivery of such care, including activities with respect to the quality, effectiveness, efficiency, appropriateness and value of healthcare services and with respect to quality measurement and improvement. 42 U.S.C. 299a(a)(1) and (2).

Method of Collection
To achieve the goals of this project the following data collection will be implemented:

(1) Interviews with contractors—Interviews will be conducted with the project leaders (project directors or project managers) from 40 HAT contractors. The purpose of these interviews is to identify (a) key findings, (b) gaps in knowledge base, (c) lessons learned, (d) effective approaches for preventing and reducing HAIs, and e) opportunities for additional projects focused on generating and implementing knowledge on preventing HAIs.

(2) Interviews with grantees—Interviews will be conducted with the project leaders (principal investigators) from 18 HAT grantees. Similar to the interviews with contractors, the purpose of these interviews is to identify (a) key findings, (b) gaps in knowledge base, (c) lessons learned, (d) effective approaches for preventing and reducing HAIs, and (e) opportunities for additional projects focused on generating and implementing knowledge on preventing HAIs.

The respondents are the project leaders, that is, project directors for the contracts and principal investigators for the grants. Based on the type of grant and the project leaders’ qualifications, the project leaders were categorized into three labor categories: Social Scientists and Related Workers; Epidemiologists; and Medical Scientists. For example, one project director conducting a randomized controlled trial is a physician and was categorized into the Medical Scientist labor category. Other project leaders have advanced degrees in the social sciences (e.g., gerontology) or epidemiology and were included in the Social Scientist or Epidemiologist labor categories, as appropriate.

Estimated Annual Respondent Burden
Exhibit 1 shows the estimated annualized burden hours for the respondent’s time to participate in this evaluation. Interviews will be conducted with 40 contractors and 18 grantees and each will last about 90 minutes. The total burden hours are estimated to be 87.

Exhibit 2 shows the estimated annualized cost burden associated with the respondent’s time to participate in the evaluation. The total cost burden is estimated to be $3,450.
Estimated Annual Costs to the Federal Government

Exhibit 3 shows the estimated total and annualized cost to the government for conducting the evaluation. The total cost is estimated to be $87,502.

Request for Comments

In accordance with the Paperwork Reduction Act, comments on AHRQ’s information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ healthcare research and healthcare information dissemination functions, including whether the information will have practical utility; (b) the accuracy of AHRQ’s estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency’s subsequent request for OMB approval of the proposed information collection. All comments will become a matter of public record.
