DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

National Customs Automation Program (NCAP) Test Concerning Automated Commercial Environment (ACE) Document Image System (DIS)

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: General notice.

SUMMARY: This document announces U.S. Customs and Border Protection's (CBP's) plan to conduct a National Customs Automation Program (NCAP) test concerning document imaging. During the test, certain Automated Commercial Environment (ACE) participants will be able to submit electronic images of a specific set of CBP and Participating Government Agency (PGA) forms and supporting information to CBP. Specifically, importers, and brokers, will be allowed to submit official CBP documents and specified PGA forms via the Electronic Data Interchange (EDI). This notice also describes test particulars including commencement date, eligibility, procedural and documentation requirements, and test development and evaluation methods. The test will be known as the Document Image System (DIS) Test.

DATES: The DIS test will commence no earlier than April 6, 2012 and will continue until concluded by way of announcement in the **Federal Register**. Comments concerning this notice and any aspect of the test may be submitted at any time during the test to the address set forth below.

ADDRESSES: Comments concerning this notice should be submitted via email to Monica Crockett at ESARinfoinbox@dhs.gov. In the subject line of your email, please indicate "Document Image System (DIS)".

FOR FURTHER INFORMATION CONTACT: For policy-related questions, contact Monica Crockett at monica.crockett@dhs.gov. For technical questions related to ABI transmissions, contact your assigned client representative. Any PGA interested in participating in DIS should contact Susan Dyszel at susan.dyszel@dhs.gov. Interested parties

without an assigned client representative should direct their questions to Susan Maskell at susan.maskell@dhs.gov.

SUPPLEMENTARY INFORMATION:

Background

The National Customs Automation Program (NCAP) was established in Subtitle B of Title VI—Customs Modernization, in the North American Free Trade Agreement Implementation Act (Pub. L. 103-182, 107 Stat. 2057, 2170, December 8, 1993) (Customs Modernization Act). See 19 U.S.C. 1411. Through NCAP, the initial thrust of customs modernization was on trade compliance and the development of the Automated Commercial Environment (ACE), the planned successor to the Automated Commercial System (ACS). ACE is an automated and electronic system for commercial trade processing which is intended to streamline business processes, facilitate growth in trade, ensure cargo security, and foster participation in global commerce, while ensuring compliance with U.S. laws and regulations and reducing costs for U.S. Customs and Border Protection (CBP) and all of its communities of interest. The ability to meet these objectives depends on successfully modernizing CBP's business functions and the information technology that supports those functions. CBP's modernization efforts are accomplished through phased releases of ACE component functionality designed to replace a specific legacy ACS function. Each release will begin with a test and will end with mandatory compliance with the new ACE feature, thus retiring the legacy ACS function. Each release builds on previous releases and sets the foundation for subsequent releases.

ACE prototypes are tested in accordance with § 101.9(b) of title 19 of the Code of Federal Regulations (19 CFR 101.9(b)), which provides for the testing of NCAP components including ACE. For the convenience of the public, a chronological listing of **Federal Register** publications detailing ACE test developments in Entry, Summary, Accounts and Revenue (ESAR) is set forth below in Section X, entitled, "Development of ACE Prototypes." The procedures and criteria related to participation in the prior ACE tests remain in effect unless otherwise explicitly changed by this or subsequent notices published in the **Federal Register**.

Document Image System (DIS) Test Program

This notice announces a CBP plan to allow parties who have been accepted in previous ESAR tests and who file entry summaries in ACE to submit specified CBP and PGA documents via the Electronic Data Interchange (EDI) as part of the Document Image System (DIS) test. DIS is currently a stand-alone system that will eventually support integration with other CBP systems and other government agencies. DIS capabilities will be delivered in multiple phases.

The first phase, and the subject of this notice, will enable participating importers and brokers to transmit images of specified CBP and PGA forms with supporting information via EDI in an Extensible Markup Language (XML) format, in lieu of conventional paper methods. DIS will provide for the storage of all submitted documents in a secure centralized location for the maintenance of associations with ACE entry summary transactions. Authorized CBP and PGA users will have the ability to access document images submitted by trade participants via a user interface, which will allow CBP and PGA users to select specific documents for review, to change the status of documents, and to add comments based on the current state of their review. The interface will also allow the document image to be downloaded or printed, if necessary. This first phase will be limited to the forms listed below in Section III of this notice. Subsequent deployment phases of DIS will extend the functionality developed in this first phase to other CBP and PGA systems. These latter phases will incorporate additional forms into DIS and provide new interfaces for integration of DIS with other systems in CBP and other government agencies. The exact dates and content of subsequent phases of DIS have not yet been determined but will be announced in the **Federal Register** when set.

Test Participation

I. Eligibility Requirements

In order to be eligible to participate in the DIS test, importers or brokers must be ACE entry summary filers. Interested participants should contact their client representative for additional information pertaining to participation in this test. Interested companies that do not currently have an assigned client representative should submit a Letter of Intent expressing their intent to participate in the DIS test so that client representatives can be assigned. Instructions for the preparation of the Letter of Intent can be found on the CBP
