Proposed Project: Prevention Communication Formative Research Revision—OMB No. 0990-0281—Office

of Disease Prevention and Health Promotion.

Abstract: The information collected will be used as formative communication research to provide guidance to the development and implementation of its disease prevention and health promotion communication and education efforts, including the Physical Activity and Dietary Guidelines for Americans. It is necessary to obtain consumer input to better understand the informative needs, attitudes, and beliefs of the audience in order to tailor messages, as well as to assist with clarity, understandability, and acceptance of prototyped messages, materials, and online tools. This generic clearance request describes data collection activities involving a limited set of focus groups, individual interviews, Web-based concept and prototype testing, and usability and effects testing to establish a deeper understanding of the interests and needs of consumers and health intermediaries for disease prevention and health promotion information and tools. The program is requesting a three year clearance.

Description: The Annual Survey of Refugees collects information on the social and economic circumstances of a random sample of refugees, Amerasians, and entrants who arrived in the United States in the five years prior to the date of the survey. The survey focuses on the refugees training, labor force participation, and welfare utilization rates. Dates are segmented by region of origin, State of resettlement, and number of months since arrival. From the responses, the Office of Refugee Resettlement reports on the economic adjustment of refugees to the American economy. These data are used by

Congress in its annual deliberations for refugee admissions and funding and by program managers in formulating policies for the future direction of the Refugee Resettlement Program.

Respondents: Refugees, entrants, Amerasians, and Havana parolees.
