Background Information*Overview of the OSHA Directorate of Training and Education (DTE)*

DTE, located in Arlington Heights, Illinois, supports the Agency's mission and performance goals of securing safe and healthy workplaces and increasing workers' voice in the workplace through the development and delivery of training courses and educational programs. The Directorate has four distinct functional areas: the OSHA Training Institute (OTI), the Office of Training and Educational Programs, the Office of Training and Educational Development, and the Office of Administration and Training Information.

The Directorate provides training for federal and state compliance officers and State consultants. The Directorate administers three distinct external training programs including the OTI Education Centers Program, the Outreach Training Program, and the Susan Harwood Training Grants Program. The Resource Center Loan Program supports safety and health training through the loan of educational materials to authorized borrowers. The Directorate also develops training and educational materials that support OTI courses and the Agency's compliance assistance initiatives.

Overview of the OSHA Training Institute (OTI)

OTI, located in Arlington Heights, Illinois, is OSHA's primary training provider. OTI conducts over 50 unique course offerings on an annual basis. Training includes job hazard recognition as well as OSHA standards, policies, and procedures for persons responsible for enforcing or directly supporting the Occupational Safety and Health Act of 1970. Courses include practical exercises that utilize the industrial hygiene, safety and construction laboratories in addition to field sites. The OTI's primary responsibility is to federal and state

compliance officers and state consultation program staff. Private sector personnel and federal personnel from agencies other than OSHA may receive training from OTI when space is available. However, the OTI Education Centers are the primary training providers for private sector personnel and federal personnel from agencies other than OSHA.

Overview of OTI Education Centers

The OTI Education Centers are a national network of non-profit organizations authorized by OSHA to deliver occupational safety and health training to private sector workers, supervisors, and employers on behalf of OSHA. The OTI Education Centers Program was initiated in 1992 when OSHA began partnering with other training and educational institutions to conduct OTI courses for private sector personnel, federal personnel from agencies other than OSHA, and state and municipal employees. The OTI Education Centers Program support OSHA's training and education mission through a variety of safety and health programs.

OTI Education Center courses include OSHA standards and Outreach Training Program trainer and update courses. Additional course offerings include topics such as recordkeeping, machine guarding, confined space, electrical standards, and fall arrest systems. Information regarding the OTI Education Centers Program background, including a complete list of current organizations, course offerings, and descriptions can be found on the OSHA Web site at: <http://www.osha.gov/dte/training/edcenters/index.html>.

OTI Education Centers are selected through a national competitive process and receive no funding from OSHA; they support their OSHA training through their normal tuition and fee structures. OTI Education Centers are located in all OSHA Regions and work closely with OSHA Regional and Area offices to meet the needs of the regional constituency. OTI Education Centers are encouraged to conduct courses at host-sites other than their own facilities and in other states within their Region. Host-site organizations must be non-profit organizations. OTI Education Centers are also responsible for authorizing trainers, processing trainer card requests, and conducting monitoring activity for the OSHA Outreach Training Program.

Overview of the OSHA Outreach Training Program

The OSHA Outreach Training Program was established during the

early years of the Agency to provide an overview of OSHA and to rapidly disseminate basic occupational safety and health workplace hazard information to workers using independent authorized trainers. Courses are intended to provide information on worker rights, employer responsibilities, and how to file a complaint as well as focusing on work-related hazards. Outreach Training Program courses do not focus on or teach OSHA standards. Workers who complete the construction industry, general industry, maritime industry, or disaster site worker courses receive OSHA course completion cards from the authorized trainer who conducted the training. OSHA Outreach Trainers are authorized exclusively through the OTI Education Centers. OTI Education Centers are responsible for administering the Outreach Training Program, including issuing course completion cards to authorized Outreach trainers and conducting monitoring activity such as record audits and training observations.

The Outreach Training Program is a voluntary program. OSHA recommends Outreach Training Program courses as an introduction to worker rights, employer responsibilities, how to file a complaint and occupational safety and health hazard recognition for workers. However, some states have enacted laws mandating the training. In addition, some employers, unions, organizations or other jurisdictions may also require this training. Please note that Outreach Training Program courses do not meet specific training requirements contained in OSHA standards. Employers are responsible for training their workers on specific hazards of their job, as noted in many OSHA standards. A list of standards requiring training is found in OSHA Publication 2254 *Training Requirements in OSHA Standards and Training Guidelines* located at: www.osha.gov/pls/publications/publication.athruz?pType=Types&pID=1.

The OSHA Outreach Training Program requirements and procedures contain instructions and assistance information for Outreach Trainers. Among the issues addressed in the requirements and procedures are course topic requirements, minimum lengths for course topics, advertising restrictions, records retention, and reporting requirements. OSHA Outreach Training Program guidelines are located at: <http://www.osha.gov/dte/outreach/index.html>.
