**SUPPLEMENTARY INFORMATION:**

*Title of Collection:* Innovative Technology Experiences for Students and Teachers (ITEST) Program.

**Evaluation for the National Science Foundation**

*OMB Number:* 3145–New.

*Expiration Date of Approval:* Not applicable.

*Type of request:* Initial clearance.

*Abstract:* Innovative Technology Experiences for Students and Teachers (ITEST) is a National Science Foundation program that responds to current concerns and projections about the growing demand for professionals and information technology workers in the U.S. and seeks solutions to help ensure the breadth and depth of the STEM workforce. Information technologies are integral to both the workplace and everyday activities of most Americans. They are part of how people learn, how they interact with each other and information, and how they represent and understand their world. Attaining a basic understanding of these technologies and mastery of essential technical skills is a requirement for anyone to benefit from innovation in the modern world. The technological growth of the nation depends on a technologically literate citizenry. ITEST is designed to increase the opportunities for students and teachers to learn about, experience, and use information technologies within the context of science, technology, engineering, and mathematics (STEM), including Information Technology (IT)

courses. Supported projects are intended to provide opportunities for K–12 children and teachers to build the skills and knowledge needed to advance their study, and to function and to contribute in a technologically rich society. Additionally, exposure to engaging applications of IT is a means to stimulate student interest in the field and an important precursor to the academic preparation needed to pursue IT careers.

The ITEST program evaluation will characterize the variety of ITEST projects, measure the rigor of individual project evaluations, estimate outcomes for students and teachers involved in a sample of projects, and identify exemplary project models. In order to accomplish these tasks, the ITEST program evaluation will employ a mixed-method approach including case studies, quasi-experiments, and extensive document review. This information collection request will include a series of protocols to be used while conducting site visit interviews, a list of documents to be requested during visits, and a student-survey instrument to measure project outcomes.
