Citigroup Energy Canada ULC
Application To Export Electric Energy;
[OE Docket No. EA–326–A]

Thank you for your interest in improving the voting process in America.

Mark A. Robbins,
Chief State Election Official
Board of Elections, Washington, DC 20007. A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Regulations (10 CFR Part 1027). Copies of this application will be provided above for public review. Projected action will not have an adverse impact on the reliability of the U.S. electric power supply system. A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Regulations (10 CFR Part 1027). Copies of this application will be provided above for public review. Projected action will not have an adverse impact on the reliability of the U.S. electric power supply system.
For further information on how to submit comments, please see the SUPPLEMENTARY INFORMATION section.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: EERE through the National Renewable Energy Laboratory is developing voluntary work specifications for the work involved in home energy upgrades. This document builds upon the considerable body of material already in circulation and the cumulative knowledge gathered throughout the 30-year history of the Weatherization Assistance Program and broader home performance industry.

The development of The Guidelines for Home Energy Professionals: Standard Work Specifications for Single Family Energy Upgrades (SWS) is supported by the Weatherization Assistance Program (WAP) Training and Technical Assistance Plan (T&T). The process of developing the SWS has involved a historic collaboration between WAP practitioners and trainers, home performance contractors, building scientists, organized labor, healthy homes and worker safety experts, and other professionals in the building trades and throughout the retrofit industry. On November 9, 2010, EERE issued a notice requesting public comment on a draft version of the SWS. On March 9, 2012, EERE made available a version of the SWS that was revised in response to comments received, and provided an opportunity for public review and comment until April 11, 2012. 77 FR 19008. For background on the revised version of the SWS, see the March 29, 2012 notice.
Comments provided to date can be viewed at: http://nrel.pnnl.gov/forumdisplay.php/5-SWS-for-Single-Family-Homes.

The comment docket now identifies the commenter along with the comment provided.

A number of commenters indicated that because of the extent of changes to the revised SWS as compared to the version previously made publicly available, additional time should be provided for review and comment. This notice reopens the comment period on the revised guidelines to provide additional opportunity for public review and comment.

Submission of Comments

DOE will accept comments, data, and information regarding the proposed guidelines no later than the date specified under the DATES heading. Comments received during the period following April 11, 2012, and the date of this notice will be treated as having been timely submitted.

If submitting comments via the DOE Web page, please follow all instructions on the Web page: http://www.weatherization.energy.gov/retrofit_guidelines. This Web site is specifically designed for ease of use to facilitate the public comment process.

Comments, data, and information uploaded to regulations.gov, or submitted via DOE’s email address or regular mail should be provided in WordPerfect, Microsoft Word, PDF, or text (ASCII) file format. Interested parties should avoid the use of special characters or any form of encryption, and wherever possible, comments should include the electronic signature of the author. Comments, data, and information submitted to DOE via regular mail may include one signed paper original.

According to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit two copies: One copy of the document including all the information believed to be confidential, and one copy of the document that does not include the information believed to be confidential. DOE will make its own determination as to the confidential status of the information and treat it according to its determination.

Factors relevant to DOE when evaluating requests to treat submitted information as confidential include:

(1) A description of the items;
(2) Whether and why such items are customarily treated as confidential within the industry;
(3) Whether the information is generally known by or available from other sources;
(4) Whether the information has previously been made available to others without obligation concerning its confidentiality;
(5) An explanation of the competitive injury to the submitting person which would result from public disclosure;
(6) A date upon which such information might lose its confidential nature due to the passage of time; and
(7) Why disclosure of the information would be contrary to the public interest.

Issued in Washington, DC, on April 11, 2012.

AnnaMaria Garcia,
Acting Program Manager, Weatherization and Intergovernmental Program, Energy Efficiency and Renewable Energy.

Federal Energy Regulatory Commission

[Project No. 13680–001]

Bryant Mountain, LLC; Notice of Additional Scoping Meetings, Extension of Time To File Comments on the PAD and Scoping Document, and Identification of Issues and Associated Study Requests

a. Due to a clerical error, our notice for scoping meetings on the proposed Bryant Mountain Pumped Storage Hydroelectric Project held March 13 and 14, 2012, in Malin and Klamath Falls, Oregon was not published in the local newspaper. Therefore, Commission staff will hold two additional scoping meetings in Malin, Oregon.

Additionally, this notice extends the deadline for the filing of comments on the Pre-Application Document (PAD) and Scoping Document 1 (SD1).

b. Type of Filing: Notice of Intent to File License Application for an Original License and Commencing Pre-filing Process.

c. Project No.: 13680–001.

d. Dated Filed: December 21, 2011.

e. Submitted By: Bryant Mountain, LLC.

f. Name of Project: Bryant Mountain Pumped Storage Hydroelectric Project.

g. Location: Near Malin in Klamath County, Oregon, on lands administered by the U.S. Bureau of Land Management and private lands.
