Intent To Prepare a Draft Environmental Impact Statement for a 20-Year Dredged Material Management Plan for the Atlantic Intracoastal Waterway from Port Royal Sound, South Carolina, to the Georgia-Florida Stalene

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of Intent.

SUMMARY: The U. S. Army Corps of Engineers is the lead Federal agency for an evaluation of the maintenance dredging of the Atlantic Intracoastal Waterway (AIWW) from Port Royal Sound, South Carolina, southward to the Georgia-Florida state line. The Corps' Savannah District intends to prepare a Draft Environmental Impact Statement (DEIS) to analyze the impacts of the maintenance dredging of this portion of the AIWW, including disposal of dredged materials. The DEIS will update the project's 1976 EIS and will analyze the impacts that have occurred from periodic dredging events since 1976 to provide a baseline for evaluating projected impacts from implementing a new Dredged Material Management Plan (DMMP) over the next 20 years. The DEIS will evaluate the anticipated 20-year dredging needs and alternative disposal options, including using existing upland confined disposal areas and Ocean Dredged Material Disposal Sites (ODMDS), establishing new ODMDS, constructing new upland confined disposal areas, constructing confining structures on existing marsh disposal areas, and using open water disposal areas. In accordance with requirements of the National Environmental Policy Act, the Corps of Engineers hereby notifies the public that it is beginning preparation of a DEIS.
