In addition, this proposed 2006 24-hour PM_{2.5} clean NAAQS data determination for the Milwaukee-Racine, Wisconsin area does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

Approval and Promulgation of Implementation Plans; California; Revisions to the California State Implementation Plan Pesticide Element

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve several revisions to the Pesticide Element of the California state implementation plan (SIP). These revisions include regulations adopted by the California Department of Pesticide Regulation (CDPR) that: (1) Reduce volatile organic compound (VOC) emissions from the application of agricultural field fumigants in the South Coast, Southeast Desert, Ventura, San Joaquin Valley (SJV), and Sacramento Metro ozone nonattainment areas by restricting fumigant application methods; (2) establish a contingency fumigant emissions limit and allocation system for Ventura; (3) require CDPR to prepare and make available to the public an annual pesticide VOC emissions inventory report; and (4) require recordkeeping and reporting of pesticide usage. EPA also proposes to approve CDPR's commitments to manage VOC emissions from the use of agricultural and commercial structural pesticides in the SJV to ensure that they do not exceed 18.1 tons per day and to implement restrictions on VOC emissions in the SJV from non-fumigant pesticides by 2014. Lastly, EPA is providing its response to a remand by the Ninth Circuit Court of Appeals of EPA's 2009 approval of a revision to the California SIP related to reducing VOC emissions from pesticides.
