SUPPLEMENTARY INFORMATION:

I. Background

1. Two systems of records are being revised.

A. State Cooperative Extension Service Employees, USDA/NIFA–1. The State Cooperative Extension Service Employees System is utilized to prepare the annual salary analysis report that is used as a management tool for salary analysis purposes as well as historical purposes. Cooperative Extension Service (CES) employee records are permanently maintained in the CES Personnel Information System database of NIFA. This database is updated annually from data provided by 1862 and 1890 land-grant universities. This database is maintained by the Agricultural Research Service, Human Resources Division. The purpose of this revision to the system of records is to change the system designation from USDA/CSREES–3 to USDA/NIFA–2; change references to the agency name to NIFA to acknowledge the reorganization; identify changes in the way records are retrieved and safeguarded; update the retention and disposal section to include Records Management Policies and Procedures; update the notification procedures, records access procedures, and contesting records procedures to direct individuals to the Freedom of Information Act Officer; modify the routine uses by adding four relating to security breaches, records management inspections, oversight operations, and access by contractors/grantees/experts/consultants/and others performing work or working on behalf of the Department; and add the following sections: Security classification, purpose, and disclosure to consumer reporting agencies.

Use of this system, as established, should not result in undue infringement of any individual's right to privacy. The revised system of records will not be exempt from any provisions of the Privacy Act.

Proper safeguards are taken to prevent unauthorized access to the records. Authorization must be obtained from the Director, NIFA, or the Chief, MSB–HRD, ARS, before information is released. All records are accessed by unique passwords and logon procedures. Only those employees with a need-to-know in order to perform their duties are able to access the information.

Consistent with USDA’s information-sharing mission, information stored in the State Cooperative Extension Service Employees system of records may be shared with other USDA components, as well as appropriate Federal, State, local, Tribal, foreign, or international government agencies. This sharing will take place only after USDA determines that the receiving component or agency has a need to know the information to carry out national security, law enforcement, immigration, intelligence, or other functions consistent with the routine uses set forth in this system of records notice.

B. National Institute of Food and Agriculture Grants Systems, USDA/NIFA–3. NIFA receives research, education, and extension grant applications each year, of which approximately a quarter are awarded. The majority of these applications are subjected to a rigorous peer-review involving technical experts (scientists, educators, farmers, engineers, and extension specialists) located worldwide. Given the highly technical nature of many of these applications, the quality of the peer-review greatly depends on the appropriate matching of the subject matter of the application with the technical expertise of the potential reviewer. NIFA maintains a database of potential reviewers. Information in the database is used to match applications with the most appropriate (potential) reviewers.
Therefore, the accuracy of the database content is integral to the success of the NIFA peer review process. In addition to the reviewer information, applicant information is maintained for the proper oversight of the Federal funds and is also used to respond to inquiries from Congress, other governmental agencies, and the grantee community. The authorities for maintaining this system of records are National Agricultural Research, Extension, and Teaching Policy Act of 1977 (NARETPA), 7 U.S.C. 3318.

The purpose of this revision to the system of records is to change the system designation from USDA/CSREES–4 to USDA/NIFA–3; change the agency name to NIFA to acknowledge the reorganization; update the safeguards to include agency rules and policies; update the retention and disposal section to include Records Management Policies and Procedures; update the notification procedures, records access procedures, and contesting records procedures to direct individuals to the Freedom of Information Act Officer; modify the routine uses by adding four relating to security breaches, records management inspections, oversight operations, and the Federal Funding Accountability and Transparency Act of 2006 reflecting loans, grants, or other payments to members of the public; and add the following sections: Security classification, purpose, and disclosure to consumer reporting agencies.

Use of this system, as established, should not result in undue infringement of any individual’s right to privacy. The revised system of records will not be exempt from any provisions of the Privacy Act.

Proper safeguards are taken to prevent unauthorized access to the records. All records containing personal information are maintained in secured file cabinets or are accessed by unique passwords and logon procedures. Only those employees with a need-to-know in order to perform their duties will be able to access the information.

Consistent with USDA’s information sharing mission, information stored in the National Institute of Food and Agriculture Grants Systems system of records may be shared with other USDA components, as well as appropriate Federal, State, local, Tribal, foreign, or international government agencies. This sharing will take place only after USDA determines that the receiving component or agency has a need to know the information to carry out its functions consistent with the routine uses set forth in this system of records notice.

2. Two systems are being deleted as follows:

A. Current Research Information System, USDA/CSREES–1, is being deleted as the records no longer meet the requirements for a Privacy Act system of records.

B. International Programs Recruitment Roster, USDA/CSREES–2 is being deleted as the records are no longer relevant and necessary to accomplish a purpose of the Agency. The records no longer exist.

Notice is hereby given that USDA is revising two PA systems of records and deleting two PA systems of records maintained by NIFA, formerly CSREES.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals’ records. The Privacy Act applies to information that is maintained in a “system of records.” A “system of records” is a group of any records under the control of an agency for which information is retrieved by an identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents.

The Privacy Act requires each agency to publish in the Federal Register a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which their records are put, and to assist individuals to more easily find such files within the agency.

Below are descriptions of the State Cooperative Extension Service Employees, USDA/NIFA–2, and the National Institute of Food and Agriculture Grant Systems, USDA/ NIFA–3.

In accordance with 5 U.S.C. 552a(r), USDA has provided a report of this system of records to the Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget; Chairman, Committee on Homeland Security and Governmental Affairs, United States Senate; and Chairman, Committee on Oversight and Government Reform, U.S. House of Representatives.

Thomas J. Vilsack,
Secretary.
