**SUPPLEMENTARY INFORMATION:**

**I. Background**

Established in 1905, the Forest Service is an agency of the U.S. Department of Agriculture. The mission of the USDA's Forest Service is to sustain the health, diversity, and productivity of the Nation's forests and grasslands, which encompass 193 million acres of land, to meet the needs of present and future generations.

The purpose of this system is to allow the Forest Service to maintain records regarding contact information of private landowners in the United States who are solicited to participate in the National Woodland Owner Survey (NWOS). The contact information collected is the name, mailing address, phone number, and email address; and it is used to solicit participation in the NWOS. The information collected through the survey is used only to produce statistical reports of general trends in landowner attributes. The results from the survey are stored in a separate database and are not a part of this system of records.

Pursuant to the Privacy Act, and as part of the Forest Service's ongoing effort to review and update system of records notices, the agency proposes a new records system: National Woodland Owner Survey Database.

**II. Privacy Act**

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which their records are put, and to assist individuals to more easily find such files within the agency. Below is the description of the USDA/FS-58 National Woodland Owner Survey Database.

A report of the proposed system of records, required by 5 U.S.C. 552a(r) as implemented by Office of Management and Budget (OMB) Circular A-130, was sent to the Chairman, Committee on Homeland Security and Governmental Affairs, United States Senate; the Chairman, Committee on Oversight and Government Reform, U.S. House of Representatives; and the Administrator, Office of Information and Regulatory Affairs, OMB.

Dated: March 30, 2012.
