SUPPLEMENTARY INFORMATION:

I. Background

Section 103(a) of the Federal Mine Safety & Health Act of 1977 (30 U.S.C. 813(a)) (the Mine Act) requires that frequent inspections and investigations in coal or other mines shall be made each year for the purposes of, among other things, gathering information with respect to mandatory health or safety standards and determining whether an imminent danger exists. Section 103(h) of the Mine Act requires that every operator of a coal or other mine establish and maintain records, make reports, and provide required information to the Secretary (30 U.S.C. 813(h)).

Each operator of a coal mine is required under 30 CFR 77.1000 to establish and follow a ground control plan that is consistent with prudent engineering design and which will ensure safe working conditions. The mine operator is required by 30 CFR 77.1000-1 to file the ground control plan under § 77.1000 for highwalls, pits and spoil banks with the appropriate District Manager. Each plan is reviewed by MSHA to ensure that highwalls, pits, and spoil banks are maintained in a safe condition through the use of sound engineering design.

This information collection addresses the recordkeeping associated with:

§ 77.1000-1 Filing of plan required by 77.1000—Highwalls, pits and spoil banks; plans.

II. Desired Focus of Comments

The Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to this safety standard on ground control plans for surface coal mines and surface work areas of underground coal mines. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of the MSHA’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Address the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses, to minimize the burden of the collection of information on those who are to respond.

The public may examine publicly available documents, including the public comment version of the supporting statement, at MSHA, Office of Standards, Regulations, and Variances, 1100 Wilson Boulevard, Room 2350, Arlington, VA 22209-3939. OMB clearance requests are available on MSHA’s Web site at <http://www.msha.gov> under “Rules & Regs” on the right side of the screen by selecting *Information Collections Requests, Paperwork Reduction Act Supporting Statements*.

The document will be available on MSHA’s Web site for 60 days after the publication date of this notice. Comments submitted in writing or in electronic form will be made available for public inspection. Because comments will not be edited to remove any identifying or contact information, MSHA cautions the commenter against including any information in the submission that should not be publicly disclosed. Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

The information obtained from mine operators is used by MSHA to evaluate each plan to ensure that highwalls, pits, and spoil banks are maintained in a safe condition through the use of sound engineering design to ensure the health and safety of miners. MSHA has updated the estimates with respect to the number of respondents and responses, as well as the total burden hours and burden costs supporting this information collection extension request.
