SUPPLEMENTARY INFORMATION:**I. Abstract**

Pursuant to the Boulder Canyon Project Act (Pub. L. 70–642, 45 Stat. 1057), all diversions of mainstream Colorado River water must be in accordance with a Colorado River water entitlement. The Consolidated Decree of the United States Supreme Court in *Arizona v. California*, 547 U.S. 150 (2006) requires the Secretary of the Interior to account for all diversions of mainstream Colorado River water along the lower Colorado River, including water drawn from the mainstream by underground pumping. To meet the water entitlement and accounting obligations, an inventory of wells and river pumps is required along the lower Colorado River, and the gathering of specific information concerning these wells.

II. Data

OMB Control Number: 1006–0014.
Title: Lower Colorado River Well Inventory.

Form Number: Form LC–25.

Frequency: These data are collected only once for each well or river-pump owner or operator as long as changes in water use, or other changes that would impact contractual or administrative requirements, are not made. A respondent may request that the data for their well or river pump be updated after the initial inventory.

Respondents: Well and river-pump owners and operators along the lower Colorado River in Arizona, California, and Nevada. Each well and river pump owner or operator must be identified, as well as the location of their diversion and type of water use determined.

Estimated completion time: An average of 20 minutes is required to interview individual well and river-pump owners or operators. Reclamation will use the information collected during these interviews to complete the information collection form.

Estimated total number of annual responses: 1,500.

Estimated total annual burden hours: 500 hours.

III. Request for Comments

Reclamation invites your comments on:

(a) Whether the proposed collection of information is necessary for the proper performance of our functions, including whether the information will have practical use;
