

Management Agency) to obtain additional supplemental water supplies.

- Promote seasonal flexibility of deliveries to the Exchange Contractors through exchange with CVP and SWP agricultural service and M&I contractors wherein water would be delivered and then returned at a later date within the year.

Reclamation's RWSP needs additional water to provide the refuges with the increment between Level 2 and Level 4 water quantities for fish and wildlife habitat development. The Exchange Contractors propose to transfer CVP water for the production of agricultural crops or livestock and/or municipal and industrial uses because of water supply shortages or when full contract deliveries cannot otherwise be made.

The water transfers would occur largely within the San Joaquin Valley of central California but could extend to districts taking water deliveries in the North Delta. The Exchange Contractors' service area covers parts of Fresno, Madera, Merced, and Stanislaus counties. The agricultural water users that would benefit from the potential transfers are located in the counties of Stanislaus, San Joaquin, Merced, Madera, Fresno, San Benito, Santa Clara, Tulare, Kern, Kings, Contra Costa, Alameda, Monterey, and Santa Cruz counties. The wetland habitat areas that may receive the water are located in Merced, Fresno, Kings, Tulare, and Kern counties.

Some of the resources potentially affected by transfers under the proposed twenty-five year transfer program that are evaluated in the Draft EIS/EIR include: surface water including the San Joaquin River, groundwater, biological resources, land uses including agricultural lands, air quality/climate change, socioeconomic impacts including impacts to agricultural production, and environmental justice.
