### Food Safety and Inspection Service

[Docket No. FSIS–2011–0009]

#### Changes to FSIS Traceback, Recall Procedures for *Escherichia coli* O157:H7 Positive Raw Beef Product, and Availability of Compliance Guidelines

**AGENCY:** Food Safety and Inspection Service, USDA.

**ACTION:** Notice.

**SUMMARY:** The Food Safety and Inspection Service (FSIS) is announcing proposed new procedures that it intends to implement when FSIS or other Federal or State agencies find raw ground beef presumptive positive for *Escherichia coli* (*E. coli*) O157:H7. This methodology will enable FSIS to better determine whether the establishments that produced the source materials for contaminated product have produced other product that may not be microbiologically independent from the contaminated product. The Agency is also announcing its intention to now, as a matter of routine policy, request a recall if an establishment was the sole supplier of beef trim source materials for ground product that FSIS or other Federal or State agencies find positive for *E. coli* O157:H7, evidence suggests that contamination most likely occurred at the supplier establishment, and a portion of the product from the originating source lot was sent to other establishments. This notice also explains that FSIS intends to determine whether it can make better use of establishment results and also intends to conduct a study to help it identify the source of *E. coli* O157:H7 positive ground beef when the material from multiple suppliers was used to produce positive product. Finally, this notice announces the availability of compliance guidelines concerning establishment sampling and testing for shiga toxin-producing *E. coli* (STEC) organisms or virulence markers and compliance guidelines for *E. coli* O157:H7 sampled and tested labeling claims.

**DATES:** FSIS requests comments on policies and procedures in this notice by July 6, 2012. FSIS intends to evaluate comments, make any necessary changes to policies and procedures based on
