recognize the importance of ensuring that Alaska Native Organizations and federally recognized tribes are informed, engaged, and involved during the permitting process and will continue to work with the ANOs and tribes to discuss their operations and activities.

On February 6, 2012, in response to requests for government to government consultations by the CIMMC and Native Village of Eklutna, NMFS met with representatives from these two groups and a representative from the Ninilchik. We engaged in discussions about the proposed IHA, the MMPA process for issuing an IHA, concerns regarding Cook Inlet beluga whales, and achieving greater coordination with NMFS on issues that impact tribal concerns. NMFS considered these communications before issuing its IHA.

NMFS anticipates that any effects from Apache’s seismic survey on marine mammals, especially harbor seals and endangered Cook Inlet beluga whales, which are or have been taken for subsistence uses, would be short-term, site-specific, and limited to inconsequential changes in behavior and mild stress responses. NMFS does not anticipate that the authorized taking of affected species or stocks will reduce the availability of the species to a level insufficient for a harvest to meet subsistence needs by: (1) Causing the marine mammals to abandon or avoid hunting areas; (2) directly displacing subsistence users; or (3) placing physical barriers between the marine mammals and the subsistence hunters; and that cannot be sufficiently mitigated by other measures to increase the availability of marine mammals to allow subsistence needs to be met. Therefore, NMFS has determined that the authorized taking will not have an unmitigable adverse impact on the availability of Cook Inlet marine mammal stocks for subsistence uses.

**Endangered Species Act (ESA)**

There are two marine mammal species listed as endangered under the ESA with confirmed or possible occurrence in the proposed project area: the Cook Inlet beluga whale and western DPS of Steller sea lion. On September 2, 2011, NMFS’ Permits and Conservation Division initiated consultation with NMFS’ Protected Resources Division under section 7 of the ESA on the issuance of an IHA to Apache under section 101(a)(5)(D) of the MMPA for this activity. Consultation was concluded and a biological opinion issued prior to issuance of the IHA. That biological opinion determined the proposed action is not likely to jeopardize the continued existence of the Cook Inlet beluga whales or the western DPS of Steller sea lions, or to destroy or adversely modify Cook Inlet beluga whale critical habitat.

**National Environmental Policy Act (NEPA)**

NMFS prepared an Environmental Assessment to determine whether this proposed activity will have a significant effect on the human environment. This analysis was completed prior to the issuance of the IHA with NMFS’ issuance of a Finding of No Significant Impact (FONSI).

**Authorization**

NMFS has issued an incidental harassment authorization for the take of marine mammals incidental to Apache’s seismic survey in Cook Inlet, Alaska, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.
