Submission for OMB Review; Comment Request

Title: Understanding Urban Indians’ Interactions with ACF Programs and Services.

OMB No.: New Collection.

Description: As part of the “Understanding Urban Indians’ Interactions with ACF Programs and Services” research study, telephone interviews will be conducted with up to 34 directors of Urban Indian Centers around the county, and site visits will be made to four urban areas with a high percentage of American Indians or Alaska Natives within the population: Phoenix, AZ; New York City, NY; Minneapolis, MN; and Anchorage, Alaska. Members of the research study team will utilize a telephone interview guide and field discussion guide to collect information from staff members at relevant programs and organizations (e.g., American Indian Organizations, social service agencies serving urban Indians) in these areas.

The goal of this information collection is to assess the challenges and context for family self-sufficiency for urban Indians and their interaction with services and programs offered by ACF. The information gathered will help to generate recommendations and action items for ACF in seeking to better understand and meet the needs of the urban Indian population.

Respondents: Urban Indian Center directors, non-Native service providers, Native service providers, and AI/AN residents.

Estimated Total Annual Burden Hours: 154.5.

Additional Information
Copies of the proposed collection may be obtained by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 370 L’Enfant Promenade SW., Washington, DC 20447, Attn: OPRE Reports Clearance Officer. All requests should be identified by the title of the information collection. Email address: OPREInfocollection@acf.hhs.gov.

Family Assistance (OFA), Health Profession Opportunity Grants (HPOG) program announces the award of a single-source program expansion supplement to Pima County Community College District (PCC), a public/state controlled institution of higher education in Tucson, Arizona. Expansion supplement funds will support the acceleration of enrollment in Project Year Two, necessitated by a random assignment study entitled— Innovative Strategies for Increasing Self-Sufficiency (ISIS). This allows PCC to meet the sample size required by ISIS in the specific time period.

PCC was found to be an ideal fit as an ISIS evaluation site due to its unique program characteristics. The program has a clear articulated career pathway program, capacity to achieve a treatment sample of 500 or more over two project years, and a treatment sample that would be clearly distinct from the control sample because of the provision of intensive support and HPOG specific classes that are contextualized and compressed.
