Title: NESHAP for Miscellaneous Metal Parts and Products (Renewal).

ICR Numbers: EPA ICR Number 2056.04, OMB Control Number 2060-0486.

ICR Status: This ICR is scheduled to expire on July 31, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart MMMM.

Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or

malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart MMMM, as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for the EPA regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 226 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and either transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of miscellaneous metal parts and products.

Estimated Number of Respondents: 4,992.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden: 2,254,948.

Estimated Total Annual Cost: \$217,117,118, which includes \$216,067,118 in labor costs, no capital/startup costs, and \$1,050,000 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an adjustment decrease in the labor hours for the respondent as compared to the

most recently approved ICR. This decrease is not due to any program changes. The decrease reflects a correction in the “person-hours per occurrence” estimate for magnet wire facilities in Table 1 based on comments received from industry consultation. The per-person burden hour estimate for line items “5.1 Gather information and monitor” and “6.1 Process/compile and review” in the previous ICR were incorrectly based on burden estimates for the entire industry sector rather than a single magnet wire facility, and therefore were inflated by a factor of ten.

There is an increase in the total O&M costs in this ICR as compared to the previous ICR. This change reflects an update in the respondent universe for the magnet wire industry. Based on comments received from consultation, EPA updated the number of magnet wire facilities from 10 to 11 in order to reflect more accurately the potential respondent universe.

In addition, there is an increase in burden costs to both the respondent and the Agency due to an adjustment in labor rates. This ICR uses the most recent labor rates from the U.S. Bureau of Labor Statistics in calculating the labor costs.

John Moses,

Director, Collection Strategies Division.

Title: CAIR to Reduce Interstate Transport of Fine Particle Matter and Ozone (Renewal).

ICR numbers: EPA ICR No. 2152.05, OMB Control No. 2060-0570.

ICR Status: This ICR is currently scheduled to expire on May 31, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: In 2005, the United States Environmental Protection Agency (EPA) promulgated the Clean Air Interstate Rule (CAIR) to Reduce Interstate Transport of Fine Particle Matter and Ozone. CAIR combined its reporting requirements with existing requirements from the Emission Reporting Requirements for Ozone State Implementation Plan (SIP) Revisions Relating to Statewide Budgets for NO_x Emissions to Reduce Regional Transport of Ozone (NO_x SIP Call) and the Acid Rain Program (ARP) under Title IV of the CAA Amendments of 1990. These other requirements have approved ICRs in place. The ARP is covered under OMB Control Number 2060-0258. The NO_x SIP Call, OMB Control Number 2060-0445, was revised in 2008 and sources previously subject to the NO_x SIP Call requirements are now covered under CAIR. In 2009 an administrative change was made to include Delaware and New Jersey in the Clean Air Interstate Rule, OMB Control Number 2060-0584 in this ICR. This ICR is being submitted to account for the incremental burden associated with CAIR. As such, the supporting statement references the burden analysis included in the ICRs for the NO_x SIP Call and ARP and estimates the change in burden resulting from CAIR beyond the scope of these ICRs. This ICR details the ongoing burdens associated with CAIR. These
