SUPPLEMENTARY INFORMATION:

Title: Current Population Survey Food Security Supplement.

OMB Number: 0536-0043.

Expiration Date of Approval: December 31, 2012.

Type of Request: Intent To Seek Approval To Extend an Information Collection for 3 Years.

Abstract: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13) and OMB regulations at 5 CFR part 1320 (60 FR 44978, August 29, 1995), this notice announces the ERS intention to request renewal of approval for an annual information collection. The U.S. Census Bureau will supplement the December CPS, beginning in 2013, with questions regarding household food shopping, use of food and nutrition assistance programs, food sufficiency, and difficulties in meeting household food needs. A similar supplement has been appended to the CPS annually since 1995. The last collection was in December 2011.

ERS is responsible for conducting studies and evaluations of the Nation's food and nutrition assistance programs that are administered by the Food and Nutrition Service (FNS), U.S. Department of Agriculture. The Department currently spends about \$103 billion each year to ensure access to nutritious, healthful diets for all Americans. The Food and Nutrition Service administers the 15 food assistance programs of the USDA including the Supplemental Nutrition Assistance Program (SNAP), formerly called the Food Stamp Program, the National School Lunch Program, and the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). These programs, which serve 1 in 4 Americans, represent our Nation's commitment to the principle that no one in our country should lack the food needed for an active, healthy life. They provide a safety net to people in need. The programs' goals are to provide needy persons with access to a more nutritious diet, to improve the eating habits of the Nation's children, and to help America's farmers by providing an outlet for the distribution of food purchased under farmer assistance authorities.

The data collected by the food security supplement will be used to monitor the prevalence of food security and the prevalence and severity of food insecurity among the Nation's households. The prevalence of these conditions as well as year-to-year trends in their prevalence will be estimated at the national level and for population subgroups. The data will also be used to monitor the amounts that households spend for food and their use of community food pantries and emergency kitchens. These statistics along with research based on the data will be used to identify the causes and

consequences of food insecurity, and to assess the need for, and performance of, domestic food assistance programs. The data will also be used to improve the measurement of food security and to develop measures of additional aspects and dimensions of food security. This consistent measurement of the extent and severity of food insecurity will aid in policy decision-making.

The supplemental survey instrument was developed in conjunction with food security experts nationwide as well as survey method experts within the Census Bureau and was reviewed in 2006 by the Committee on National Statistics of the National Research Council. This supplemental information will be collected by both personal visit and telephone interviews in conjunction with the regular monthly CPS interviewing. Interviews will be conducted using Computer Assisted Personal Interview (CAPI) and Computer Assisted Telephone Interview (CATI) methods.

Authority: Legislative authority for the planned data collection are 7 U.S.C. 2204(a) and 7 U.S.C. 2026(a)(1) of the Food and Nutrition Act of 2008. This latter section authorizes the Secretary to enter into contracts with private and public institutions to collect data to undertake research that would improve the administration and effectiveness of the SNAP in delivering nutrition-related benefits.

Estimate of Burden: Public reporting burden for this data collection is estimated to average 7.7 minutes (after rounding) for each household that responds to the labor force portion of the CPS. The estimate is based on the number of households that were asked each question in recent survey years and typical reading and response times for the questions.

Respondents: Individuals or households.

Estimated Total Number of Respondents: 53,935.

Estimated Total Annual Burden on Respondents: 6,927 hours. Copies of this information collection can be obtained from Mark Nord at the address in the preamble.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of

information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments should be sent to the address in the preamble. All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Signed at Washington, DC, May 7, 2012.

Mary Bohman,
Administrator.

SUPPLEMENTARY INFORMATION: Article 5 of the WTO Agreement on Agriculture provides that additional import duties may be imposed on imports of products subject to tariffication as a result of the Uruguay Round, if certain conditions are met. The agreement permits additional duties to be charged if the price of an individual shipment of imported products falls below the average price for similar goods imported during the years 1986-88 by a specified percentage. It also permits additional duties to be imposed if the volume of imports of an article exceeds the average of the most recent 3 years for which data are available by 5, 10, or 25 percent, depending on the article. These additional duties may not be imposed on quantities for which minimum or current access commitments were made during the Uruguay Round negotiations, and only one type of safeguard, price or quantity, may be applied at any given time to an article.

Section 405 of the Uruguay Round Agreements Act requires that the President cause to be published in the
