The following additional restrictions apply to these TMEs. A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME. In addition, the applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. Records of the quantity of the TME substance produced and the date of manufacture.

2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.

3. Copies of the bill of lading that accompanies each shipment of the TME substance.

V. What was EPA's risk assessment for these TMEs?

EPA identified no significant health or environmental concerns for the test market substances, due to either the low toxicity of each substance or low expected exposure. Therefore, the test market activities will not present any unreasonable risk of injury to human health or the environment. Many of these TMEs were submitted per the TSCA New Chemicals Sustainable Futures Voluntary Pilot Project which is designed to develop low risk chemicals; see the **Federal Register** of December 11, 2002 (67 FR 76282) (FRL-7198-6).

VI. Can EPA change its decision on these TMEs in the future?

Yes. The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information that comes to its attention cast significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to human health or the environment.
