**SUPPLEMENTARY INFORMATION:****I. Environmental Assessment Summary**

By letter dated September 17, 2010, Calvert Cliffs Nuclear Power Plant, LLC (CCNPP) submitted an application to the NRC to renew NRC License SNM-2505 for the CCNPP site-specific Independent Spent Fuel Storage Installation (ISFSI) that expires on November 30, 2012. CCNPP is requesting renewal of NRC License SNM-2505 for a 40-year period to authorize CCNPP to continue ISFSI operations at the Calvert Cliffs site near Lusby, Maryland. CCNPP supplemented its application on February 10, 2011. On March 11, 2011, the NRC staff found CCNPP's application to be acceptable for a detailed review. In response to NRC staff requests for additional information, CCNPP provided supplemental information on June 14, June 28, and December 15, 2011.

The NRC staff has prepared an EA to document its environmental review of the proposed license renewal. The NRC staff considered the following environmental resource areas in its evaluation: land use; transportation; socioeconomics; air quality; water quality and use; geology and soils; ecology; noise; historical and cultural; scenic and visual; public and occupational health and safety; and waste management. Based on the NRC staff's evaluation, the potential environmental impacts on these resource areas were determined to be small. In its license renewal request, CCNPP is proposing no changes in how it handles or stores spent fuel at the ISFSI, and no significant changes in CCNPP's authorized operations for the ISFSI are planned during the proposed
