SUPPLEMENTARY INFORMATION:

Summary of Information Collection

This effort will collect qualitative
information through needs assessments
and evaluations. Feedback will be used
as guidance for developing and
evaluating DSS security education,
training, and professionalization
programs.

Two information collection efforts are
required. Responses to both collections
are voluntary.

The needs assessment is conducted
prior to the development of training to
collect data that will, in turn, be used
to prescribe an appropriate course of
action in response to a compliance
requirement or to a performance
deficiency that has been identified.
Some of the collection questions are
uniform, while others are unique to the
type of product or service that is being
requested. We request information in
several areas, including: organizational
goals and desired performance, training
conditions, technological environment,
types of jobs and tasks, types of
programs needed, and target audience.

Evaluations are completed after a
course of action has been implemented
to collect data used to gather
information about: the unmet training
needs of the population served;
maintaining and/or improving the
course, job aid, or security event; and/
or the effectiveness of operations that
provide programs and activities
supporting the job performance of
security professionals.

Defense Security Service, Center for
Development of Security Excellence,
management, instructional systems
designers, and instructional, technical
and support staff responsible for the
design and development of security
products and services, will be the users
of the data collected from needs
assessments and evaluations.
