
FOR FURTHER INFORMATION CONTACT: Cedric Perry, BLM Project Manager, telephone (951) 697–5388; address 22835 Calle San Juan De Los Lagos, Moreno Valley, CA 92553; email Cedric_Perry@ca.blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at (800) 877–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Pattern Energy, Inc., through its wholly owned subsidiary, Ocotillo Express LLC, filed right-of-way (ROW) application CACA–51552 for the OWEF. The project as originally proposed would have consisted of 155 wind turbines (1.6 to 3.0 MW each) on 12,436 acres of predominately BLM-managed lands with a generating capacity of up to 465 MW and the following ancillary facilities; a substation; administration, operations and maintenance facilities; transmission lines; and temporary construction lay down areas. The project site is located west of the city of El Centro in Imperial County, California.

The project site is in the California Desert District within the planning boundary of the CDCA Plan, which is the applicable Resource Management Plan for the project site and surrounding areas. The CDCA Plan, while recognizing the potential compatibility of wind energy generation facilities with other uses on public lands, requires that all sites associated with power generation or transmission not already identified in the Plan be considered through the BLM’s land use plan amendment process. As a result, in connection with its approval of a ROW grant for the OWEF, the BLM had to amend the CDCA Plan to recognize the project site as suitable for wind energy development. The approved Amendment to the CDCA Plan specifically amends the CDCA Plan to make such a determination.

The BLM Preferred Alternative identified in the Final Environmental Impact Statement/Environmental Impact Report (EIS/EIR) is the Refined Project, which involves the construction and operation of 112 wind turbines at the project site, with a generating capacity of up to 315 MW. The Refined Project eliminates 43 turbines that were analyzed under the Proposed Action in order to reduce effects to cultural resources. The Refined Project configuration is comprised of a subset of the turbine sites that are already part of the existing alternatives analyzed in the Final EIS/EIR. The Refined Project was approved by the ROD and will result in construction of the wind generation facility consisting of: up to 112 turbines with a generating capacity of 315 MW on approximately 10,151 acres of BLM-managed lands in Imperial Valley, California, and the following ancillary facilities: a substation; administration, operations and maintenance facilities; transmission lines; and temporary construction lay down areas.

With respect to the plan amendment, the publication of the Notice of Availability for the Final EIS/EIR on March 9, 2012 initiated a 30-day protest period on the proposed plan amendment, which concluded April 9, 2012. The BLM received 12 timely and complete written protests, each of which was resolved prior to the execution of the ROD. These protest resolutions are summarized in the Director’s Protest Summary Report attached to the ROD. The proposed amendment to the CDCA Plan was not modified as a result of the protests received or their resolution. Simultaneously with the plan amendment protest period, the Governor of California conducted an expedited 30-day consistency review of the proposed CDCA Plan amendment to identify any inconsistencies with State or local plan, policies or programs; no inconsistencies were identified by the Governor’s Office.

Because this decision is approved by the Secretary of the Interior, it is not subject to administrative appeal (43 CFR 4.410(a)(3)).

Authority: 40 CFR 1506.6.

Timothy Spisak,
Deputy Assistant Director, Bureau of Land Management.

National Park Service

National Register of Historic Places; Notification of Pending Nominations and Related Actions

Nominations for the following properties being considered for listing or related actions in the National Register were received by the National Park Service before May 19, 2012.

Pursuant to section 60.13 of 36 CFR part 60, written comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation. Comments may be forwarded by United States Postal Service, to the National Register of Historic Places, National Park Service, 1849 C St. NW., MS 2280, Washington, DC 20240; by all other carriers, National Register of Historic Places, National Park Service, 1201 Eye St. NW., 8th floor, Washington, DC 20005; or by fax, 202–371–6447. Written or faxed comments should be submitted by June 28, 2012. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

J. Paul Loether,
Chief, National Register of Historic Places/ National Historic Landmarks Program.

[Investigation Nos. 701–TA–481 and 731–TA–1190 (Final)]

Crystalline Silicon Photovoltaic Cells and Modules From China; Scheduling of the Final Phase of Countervailing Duty and Antidumping Investigations

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of the final phase of countervailing duty investigation No. 701–TA–481 (Final) under section 705(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)) (the Act) and the final phase of antidumping investigation No. 731–TA–1190 (Final) under section 735(b) of the Act (19 U.S.C. 1673d(b)) to determine whether an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of subsidized and less-than-fair-value imports from China of crystalline silicon photovoltaic cells and modules, provided for in subheadings 8501.31.80, 8501.61.00, 8507.20.80, and 8541.40.60 of the Harmonized Tariff Schedule of the United States.1

1For purposes of these investigations, the Department of Commerce has defined the subject merchandise as “crystalline silicon photovoltaic cells, and modules, laminates, and panels, consisting of crystalline silicon photovoltaic cells, whether or not partially or fully assembled into other products, including, but not limited to, modules, laminates, panels and building integrated materials.”

This investigation covers crystalline silicon photovoltaic cells of thickness equal to or greater than 20 micrometers, having a p/n junction formed by any means, whether or not the cell has undergone other processing, including, but not limited to, cleaning, etching, coating, and/or addition of materials (including, but not limited to, metallization and conductor patterns) to collect and forward the electricity that is generated by the cell. Merchandise under consideration may be described at the time of importation as parts for final finished products that are assembled after importation, including, but not limited to, modules, laminates, panels, building-integrated modules, building-integrated panels, or other finished goods kits. Such parts that otherwise meet the definition of merchandise under consideration are included in the scope of this investigation.

Excluded from the scope of this investigation are thin film photovoltaic products produced from amorphous silicon (a-Si), cadmium telluride (CdTe), or copper indium gallium selenium (CIGS). Also excluded from the scope of this investigation are crystalline silicon photovoltaic cells, not exceeding 10,000mm² in surface area, that are permanently integrated into a consumer good whose function is other than power generation and that consumes the electricity generated by the integrated crystalline silicon photovoltaic cell. Where more than one cell is permanently integrated into a consumer good, the surface area for purposes of this exclusion shall be the total combined surface area of all cells that are integrated into the consumer good.

Modules, laminates, and panels produced in a third-country from cells produced in the PRC are covered by this investigation; however, modules, laminates, and panels produced in the PRC from cells produced in a third-country are not covered by this investigation.”

For further information concerning the conduct of this phase of the investigations, bearing procedures, and rules of general application, consult the Commission’s Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

DATES: Effective Date: May 25, 2012.

Hearing-impaired persons can obtain information on this matter by contacting the Commission’s TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (http://www.usitc.gov). The public record for these investigations may be viewed on the Commission’s electronic docket (EDIS) at http://edis.usitc.gov.

SUPPLEMENTARY INFORMATION:

Background.—The final phase of these investigations is being scheduled as a result of affirmative preliminary determinations by the Department of Commerce that certain benefits which constitute subsidies within the meaning of section 703 of the Act (19 U.S.C. 1671b) are being provided to manufacturers, producers, or exporters in China of crystalline silicon photovoltaic cells and modules, and that such products are being sold in the United States at less than fair value within the meaning of section 733 of the Act (19 U.S.C. 1673b). These investigations were requested in a petition filed on October 19, 2011 by Solar World Industries America, Hillsboro, OR.

Participation in the investigations and public service list.—Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the final phase of these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in...
