Brief Description of Need for Information and Proposed Use. The OSC forms are used to enable our agency to: (1) Investigate allegations of prohibited personnel practices, (2) provide a safe, secure channel for whistleblower disclosures, and (3) enforce the Hatch Act. The survey is used by government employees and complainants whose cases with OSC were closed during the fiscal year and wish to give us feedback on the quality of our service.

Description of likely respondents, including estimated number of likely respondents and proposed frequency of response. Forms OSC–11 and OSC–12 are used by current and former Federal employees and applicants for Federal employment to submit allegations of possible prohibited personnel practices and whistleblower disclosures respectively. Form OSC–13 is used for the submission of Hatch Act complaints. The frequency of the use of the three forms, OSC–11, OSC–12, and OSC–13, is daily. The estimated number of respondents is 4,000. The survey form is voluntary and anonymous, and it is used to survey current and former Federal employees and applicants for Federal employment who have submitted allegations of possible prohibited personnel practices. The survey form also surveys complainants alleging Hatch Act violations, whose matter has been closed or otherwise resolved during the prior fiscal year, on their experience at OSC. Specifically, the survey asks questions relating to whether the respondent was: (1) Apprised of his or her rights; (2) successful at the OSC or at the Merit Systems Protection Board; and (3) satisfied with the treatment received at the OSC. The frequency of the use of this survey is annual, and the estimated number of respondents is 320 per year.

Estimate of total annual reporting and recordkeeping burden. The estimated average amount of time for a person to respond using the OSC forms is 55 minutes; the estimated annual burden for using the OSC forms is 3,666 hours. The estimated average amount of time

for a person to respond using the electronic survey is 12 minutes. The estimated annual survey burden is 64 hours.

Notice of Intent to Prepare an Environmental Impact Statement and Notice of Scoping Meeting

AGENCY: Department of State.

ACTION: Notice.

SUMMARY: In accordance with the National Environmental Policy Act (NEPA), 42 U.S.C. 4321–4347, the Department of State (DOS) announces its intent to prepare an Environmental Impact Statement (EIS) and initiate the scoping process for the proposed agency action as specified below. SUPPLEMENTARY INFORMATION:

Background: The mission of the Department of State (DOS), as the Federal executive agency responsible for international relations of the United States, is to shape and sustain a peaceful, prosperous, just, and democratic world and foster conditions for stability and progress for the benefit of the American people and people around the world. DOS has a number of domestic and international responsibilities associated with the establishment and operation of foreign

missions in the United States. In this regard, DOS is responsible for assisting foreign missions with identifying properties on which they may locate and operate chanceries (commonly referred to as embassies) in the United States.

As one of the smallest capital cities in the world, the availability of adequate space for the construction and operation of modern chanceries by foreign missions has been a longstanding challenge in the District of Columbia. In response, pursuant to the International Chancery Act of 1968, Congress authorized DOS to undertake the development of the International Chancery Center (ICC), located near the intersection of Connecticut Avenue and Van Ness Street NW. The ICC has successfully allowed foreign missions to locate their chanceries in a purpose-built community, which was designed to both address the modern needs of such operations, as well as to mitigate to the extent possible negative impacts such facilities may have, or be perceived to have, with respect to neighboring properties and citizens. The ICC has proven to be a highly successful model for balancing the Federal government's need to accommodate foreign missions with the concerns of local citizens about the location and operation of foreign chanceries in the District of Columbia. Because all lots within the ICC are fully assigned, DOS is considering establishing a second location for a similar development.

Proposed Action: The proposed action is to prepare a Master Plan for the long-term development of a Foreign Missions Center on approximately 43.5 acres of the former Walter Reed Army Medical Center (WRAMC) site, located at 16th Street NW., between Aspen Street and Alaska Avenue in Washington, DC. The proposed action includes long-term leases of Federal land to foreign governments for the purpose of constructing and operating new chancery facilities. The term "chancery" in this context means the principal offices of a foreign mission (as defined in the Foreign Missions Act) used for diplomatic or related purposes, and any annexes to these offices or support facilities, and includes the site and any buildings on the site. After several years of considering the suitability of other locations throughout the District, the DOS has concluded that the former WRAMC site presents a viable option for undertaking a development of similar size and scale to the existing ICC. The proposed action would be developed in phases and is expected to accommodate several foreign missions
