

was specifically excluding from its designation, including any standards under 40 CFR part 63 that control radionuclides, or any provisions pertaining to an accidental release prevention program. These exclusions remain in effect. EPA also specified various requirements, limitations and restrictions. All of these remain in effect.

Please also note that on December 19, 2008, in *Sierra Club v. EPA*,³ the United States Court of Appeals for the District of Columbia Circuit vacated certain provisions of the General Provisions of 40 CFR Part 63 relating to exemptions for startup, shutdown, and malfunction (SSM). On October 16, 2009, the Court issued a mandate vacating these SSM exemption provisions, which are found at 40 CFR § 63.6(f)(1) and (h)(1).

Accordingly, EPA no longer allows sources the SSM exemption as provided for in the vacated provisions at 40 CFR § 63.6(f)(1) and (h)(1), even though EPA has not yet formally removed these SSM exemption provisions from the General Provisions of 40 CFR Part 63. Because Maryland incorporated 40 CFR Part 63 by reference, Maryland should also no longer allow sources to use the former SSM exemption from the General Provisions of 40 CFR Part 63 due to the Court's ruling in *Sierra Club v. EPA*.

EPA appreciates Maryland's continuing NESHAP and NSPS enforcement efforts, and also Maryland's decision to take automatic delegation of all current and future NESHAP and NSPS by adopting them by reference.

Sincerely,
Diana Esher,
Director Air Protection Division"

This notice acknowledges the update of Maryland's delegation of authority to implement and enforce NESHAP and NSPS.

Dated: June 3, 2012.

Diana Esher,
Director, Air Protection Division, Region III.

Part 11 contains rules and regulations addressing the nation's Emergency Alert

System (EAS). The EAS provides the President with the capability to provide immediate communications and information to the general public at the national, state and local area level during periods of national emergency. The EAS also provides state and local governments and the National Weather Service with the capability to provide immediate communications and information to the general public concerning emergency situations posing a threat to life and property.

For this new collection, the Commission is requesting emergency OMB review and processing for the reporting and recordkeeping requirements in the *Fifth Report and Order*, FCC 12-7. The Commission amended its Part 11 rules governing the EAS to more fully codify the existing obligation to process Common Alerting Protocol (CAP)-formatted alert messages adopted in the *Second Report and Order*.

Certification procedures for meeting general certification requirements are under 47 CFR 11.34. Paragraphs 164-167, 107-171, and 175-176 in the *Fifth Report and Order*, establish that integrated CAP-capable EAS devices and intermediate devices that are used in tandem with legacy EAS equipment are subject to the Commission's existing device certification requirements set forth in the Commission's Part 2 equipment authorization rules. These paragraphs also establish specific procedures by which EAS device manufacturers can update existing device certifications and obtain new certifications, which generally involve the submission of test data and other materials to the FCC.

The information collected by the Commission is used to confirm that EAS devices comply with the technical and performance requirements set forth in the EAS rules and other applicable rules maintained by the Commission. These rules are designed to minimize electrical radiofrequency interference and to ensure that the EAS, including individual devices within the EAS, operate as intended.

Federal Communications Commission.

Secretary, Office of the Secretary, Office of Managing Director.
