not extend the use of power of attorney to this circumstance. Further, Florida’s proposal does not require the odometer disclosure statement made by the lessee to be co-signed by the lessor, to be submitted with title documents, or to be retained by any party. In the Agency’s view, this is an important link in the chain of odometer disclosure for a leased vehicle to ensure valid odometer disclosures.

The first purpose of the power of attorney provision in TIMA as amended was to provide limited exception(s) to a rule prohibiting a person from signing an odometer disclosure statement as both the transferor and transferee in the same transaction, which had the effect of prohibiting the use of powers of attorney for purposes of recording mileage on titles of motor vehicles. Florida’s proposal does not fit within the confines of the exceptions identified by Congress and NHTSA and does not meet this purpose of TIMA as amended.

Under Florida’s proposed program, a lessor (not a lienholder) would execute a power of attorney. No lienholder would be involved nor is there a requirement that the Title be lost. More importantly, overall purposes of TIMA as amended are not preserved by Florida’s proposed expansion of power of attorney usage. Florida seeks to use power of attorney as part of a mileage disclosure process which would use at least three separate documents to disclose mileage: an Odometer Disclosure Statement by a lessee (the form of which is unspecified), a power of attorney form, and a secure reassignment form. Florida has presented no measure of control over these documents, which can be fraudulently replaced prior to recording in Florida’s e-title system.

In the initial determination, NHTSA did not make a determination as to whether Florida’s proposal met the second, third, fourth, and sixth purposes of the disclosure required by TIMA. 76 FR 48114–48115. Florida’s comments did not provide any additional justification as to how its program was consistent with these purposes of TIMA. Accordingly, NHTSA declines to make a final determination as to whether Florida’s proposal meets these purposes.

The fifth purpose is to prevent alterations of odometer disclosures by powers of attorney and to preclude counterfeit powers of attorney through secure processes. Florida’s proposal does not satisfy this purpose. Under NHTSA’s regulations, power of attorney forms shall be issued by the State and shall be set forth by a secure process. 49 CFR 580.13(a). Under Florida’s proposal, the power of attorney document used by the lessor would not be State-issued and would not be secure. As noted above, TIMA was written in part to prevent alterations of disclosures on titles and preclude counterfeit titles by requiring secure processes. In furtherance of these purposes, paper titles must be produced using a secure printing process or there must be some “other secure process.”

Allowing lessors to transfer title and make the required disclosure through a non-secure power of attorney is inconsistent with the purpose of the odometer disclosure requirements. Accordingly, Florida’s proposed program does not meet this purpose. A power of attorney form—and any document used to reassign a vehicle title—must be issued by the State and produced by a secure process.

Finally, the overall purpose of the disclosure required by TIMA is to protect consumers by ensuring that they receive valid representations of a vehicle’s actual mileage at a time of transfer. Florida’s proposal is not consistent with this purpose.

Upon careful consideration of the comments, NHTSA adopts the analysis set forth in its initial determination, and denies Florida’s proposed alternate disclosure requirements for transfers involving leased vehicles.

D. Conclusion

For the foregoing reasons, and upon review of the entire record, NHTSA hereby issues a final determination granting Florida’s petition for requirements that apply in lieu of the federal requirements adopted under section 408(d) of the Cost Savings Act as to vehicle transfers involving casual or private sales, and denies Florida’s petition as to sales involving licensed motor vehicle dealers and leased vehicles. Other requirements of the Cost Savings Act to apply in Florida. NHTSA reserves the right to rescind this partial grant in the event that information acquired after this grant indicates that, in operation, Florida’s alternate requirements do not satisfy one or more applicable requirements.

Issued on: June 12, 2012.

David L. Strickland,
Administrator.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 100812345–2142–03]

RIN 0648–XC060

Snapper-Grouper Fishery of the South Atlantic; 2012 Commercial Accountability Measure and Closure for the South Atlantic Lesser Amberjack, Almaco Jack, and Banded Rudderfish Complex

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS implements accountability measures (AMs) for the commercial sector for the lesser amberjack, almaco jack, and banded rudderfish complex in the South Atlantic for the 2012 fishing year through this temporary rule. Commercial landings for the lesser amberjack, almaco jack, and banded rudderfish complex, as estimated by the Science Research Director (SRD), are projected to reach their combined commercial annual catch limit (ACL) on July 2, 2012. Therefore, NMFS closes the commercial sector for this complex on July 2, 2012, through the remainder of the fishing year in the exclusive economic zone (EEZ) of the South Atlantic. This closure is necessary to protect the lesser amberjack, almaco jack, and banded rudderfish resources.

DATES: This rule is effective 12:01 a.m., local time, July 2, 2012, until 12:01 a.m., local time, January 1, 2013.

ADDRESSES: Electronic copies of the Comprehensive Annual Catch Limit Amendment (Comprehensive ACL Amendment) to the Fishery Management Plans (FMPs) for the Snapper-Grouper Fishery of the South Atlantic Region (Snapper-Grouper
The combined commercial ACL for the lesser amberjack, almaco jack, and banded rudderfish complex, implemented through the Comprehensive ACL Amendment, is 193,999 lb (87,996 kg), round weight. In accordance with regulations at 50 CFR 622.49(b)(12)(i)(A), if the combined complex ACL is reached or projected to be reached, the Assistant Administrator, NMFS (AA) will file notification with the Office of the Federal Register to close the commercial sector for this complex for the remainder of the fishing year. Analysis of landings data from the NMFS Southeast Fisheries Science Center indicate that the commercial sector for this complex is projected to reach the ACL on July 2, 2012. Therefore, this temporary rule implements an AM to close the commercial sector for the lesser amberjack, almaco jack, and banded rudderfish complex in the South Atlantic, effective 12:01 a.m., local time July 2, 2012.

During the closure, all sale or purchase of lesser amberjack, almaco jack, and banded rudderfish is prohibited, and harvest or possession of these species in or from the South Atlantic EEZ is limited to the bag and possession limit, as specified at 50 CFR 622.39(d)(1)(viii) and (d)(2). This bag and possession limit applies in the South Atlantic on board a vessel for which a valid Federal commercial permit for South Atlantic snapper-grouper has been issued, without regard to where such species were harvested, i.e., in state or Federal waters. The commercial sector for the lesser amberjack, almaco jack, and banded rudderfish complex will reopen on January 1, 2013, the beginning of the 2013 commercial fishing season.

Classification

The Regional Administrator, Southeast Region, NMFS, has determined this temporary rule is necessary for the conservation and management of the lesser amberjack, almaco jack, and banded rudderfish complex, a component of the South Atlantic snapper-grouper fishery, and is consistent with the Magnuson-Stevens Act and other applicable laws.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: The snapper-grouper fishery of the South Atlantic, which includes the lesser amberjack, almaco jack, and banded rudderfish complex, is managed under the Snapper-Grouper FMP. The Snapper-Grouper FMP was prepared by the South Atlantic Fishery Management Council and is implemented under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

Background

The 2006 reauthorization of the Magnuson-Stevens Act implemented new requirements that established ACLs and AMs to end overfishing and prevent overfishing from occurring. AMs are management controls to prevent ACLs from being exceeded, and to correct or mitigate overages of the ACL if they occur.

In part, the final rule for the Comprehensive ACL Amendment specified ACLs for species in the Snapper-Grouper FMP that are not undergoing overfishing, including the lesser amberjack, almaco jack, and banded rudderfish complex, and AMs if these ACLs are reached or exceeded. Implementation of ACLs and AMs for these species is intended to prevent overfishing from occurring in the future, while maintaining catch levels consistent with achieving optimum yield for the resources (77 FR 15916, March 16, 2010).
