

ACTION: Notice of availability of a Draft Programmatic Environmental Assessment; Request for comments.

SUMMARY: NOAA's Office of Coast Survey (OCS) seeks comment on a draft programmatic environmental assessment (PEA) of the hydrographic surveys and related activities that OCS regularly conducts in navigationally significant waters around the nation. These surveys use a vessel equipped with high-frequency side scan sonar, single beam, and multibeam echosounders, which use sound waves to find and identify objects in the water and to determine water depth. Hydrographic survey projects support the OCS mission to provide reliable nautical charts and other products necessary for safe navigation and sound decision-making in U.S. ocean and coastal waters. The intended effects of the surveys are to provide the foundation for navigational charts required by all domestic ships moving people and products in and out of U.S. ports every year. Charts help prevent mariners from running ships aground or hitting dangerous obstructions (e.g., ship wrecks, marine debris, or pinnacle rocks). Groundings or collisions with other objects in the sea can result in the release of oil or dangerous chemicals into the marine environment.

Date and Time: The above document is available for public review and comment through July 22, 2012.

ADDRESSES: If you wish to comment on the OCS Draft Programmatic Environmental Assessment, you may email comments to Jeff Ferguson, Chief, Hydrographic Surveys Division at jeff.ferguson@noaa.gov.

FOR FURTHER INFORMATION CONTACT: Joselyd Garcia-Reyes or Kristy Beard, (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject amendment to Permit No. 16160 is requested under the authority of the

Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA, 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

Permit No. 16160, issued on June 5, 2012 (77 FR 35657), authorizes takes of eight species of cetaceans in the inland waters of Washington State for scientific research. Two of the eight species targeted for research are listed as threatened or endangered: Killer whales (*Orcinus orca*) from the Southern Resident stock and humpback whales (*Megaptera novaeangliae*). Other species targeted for research are: Pacific white-sided dolphins (*Lagenorhynchus obliquidens*), Dall's porpoises (*Phocoenoides dalli*), harbor porpoises (*Phocoena phocoena*), eastern gray whales (*Eschrichtius robustus*), minke whales (*B. acutorostrata*), and killer whales. The research involves harassment by vessel approach for photo-identification, behavioral observation, and monitoring. The permit expires June 6, 2017.

The permit holder is requesting the permit be amended to increase Southern Resident killer whale takes from 50 to 200 per year based on recommendations provided during the ESA Section 7 consultation.

An environmental assessment (EA) and Finding of No Significant Impact (FONSI) (signed June 4, 2012) prepared for the permit has analyzed the requested 200 Southern Resident killer whale annual takes. NMFS determined that 200 Southern Resident killer whale takes would not significantly impact the quality of the human environment and that preparation of an environmental impact statement was not required. The EA and FONSI are available upon request. A Biological Opinion was also prepared for the permit, which analyzed 200 Southern Resident killer whale takes (signed June 4, 2012) and concluded that the research would not jeopardize threatened and endangered species or destroy or adversely modify critical habitat. However, the permit authorizes 50 annual takes of Southern Resident killer whales pending public opportunity to comment on the higher take number.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the amendment request to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: June 14, 2012.
