Title: Emergency Planning and Release Notification Requirements under Emergency Planning and Community Right-to-Know Act Sections 302, 303, and 304 (Renewal).

ICR number: EPA ICR No. 1395.08, OMB Control No. 2050-0092.

ICR Status: This ICR is scheduled to expire on July 31, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The authority for these requirements is sections 302, 303, and 304 of the Emergency Planning and Community Right-to-Know Act (EPCRA), 1986 (42 U.S.C. 11002, 11003, and 11004). EPCRA established broad

emergency planning and facility reporting requirements. Section 302 requires facilities to notify their state emergency response commission (SERC) that the facility is subject to emergency planning. This activity has been completed; this ICR covers only new facilities that are subject to this requirement. Section 303 requires the local emergency planning committees (LEPCs) to prepare emergency plans for facilities that are subject to section 302. This activity has been also completed; this ICR only covers any updates needed for these emergency response plans. Section 304 requires facilities to report to SERCs and LEPCs releases in excess of the reportable quantities listed for each extremely hazardous substance (EHS). This ICR also covers the notification and the written follow-up required under this section. The implementing regulations and the list of substances for emergency planning and emergency release notification are codified in 40 CFR part 355.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2.4 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Chemical manufacturers, non-chemical manufacturers, retailers, petroleum refineries, utilities, etc.

Estimated Number of Respondents: 110,456.

Frequency of Response: Once, on occasion.

Estimated Total Annual Hour Burden: 267,206.

Estimated Total Annual Cost: \$13,626,107, includes \$0 annualized capital and \$60,327 annualized O&M costs.

Changes in the Estimates: The number of respondents increased by 12,000 from the previous ICR. This is due to an increase in the number of reports of

Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) hazardous substance and Extremely Hazardous Substance (EHS) releases reported to the National Response Center in 2011. There is a decrease of 28,550 hours from the previous ICR due to adjustments for current burden estimates. There is a decrease of \$8,392 O&M costs which is also due to adjustments to the estimates.

Title: Hazardous Remediation Waste Management Requirements (HWIR-Media) (Renewal).

ICR numbers: EPA ICR No. 1775.06, OMB Control No. 2050-0161.

ICR Status: This ICR is scheduled to expire on July 31, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9,

and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Resource Conservation and Recovery Act of 1976 (RCRA), as amended, requires EPA to establish a national regulatory program to ensure that hazardous wastes are managed in a manner protective of human health and the environment. Under this program (known as the RCRA Subtitle C program), EPA regulates newly generated hazardous wastes, as well as hazardous remediation wastes (*i.e.*, hazardous wastes managed during cleanup). To facilitate prompt and protective treatment, storage, and disposal of hazardous remediation wastes, EPA established three requirements for remediation waste management sites that are different from those for facilities managing newly generated hazardous waste: (1) Performance standards for remediation waste management sites (40 CFR 264.1(j)); (2) a provision excluding remediation waste management sites from requirements for facility-wide corrective action; and (3) a new form of RCRA permit for treating, storing, and disposing of hazardous remediation wastes (40 CFR part 270, subpart H). The new permit, a Remedial Action Plan (RAP), streamlines the permitting process for remediation waste management sites to allow cleanups to take place more quickly.

In addition, EPA created a new kind of unit called a "staging pile" (40 CFR 264.554) that allows more flexibility in storing remediation waste during cleanup. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 32 hours per response. For Respondents in Private entities, it is estimated to average 28 hours per response. For Respondents in States, it is estimated to average 51 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install,

and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Businesses or other for-profit, States.

Estimated Number of Respondents: 215.

Frequency of Response: Once.

Estimated Total Annual Hour Burden: 6,953 hours.

Estimated Total Annual Cost: \$397,489, which includes \$371,571 in annualized labor costs and \$25,918 in annualized capital or O&M costs.

Changes in the Estimates: There is no change in the total estimated hour burden currently identified in the OMB Inventory of Approved ICR Burdens. There is an increase of \$1,445 in O&M costs which is due to updating estimates to current levels.
