k. *Description of Request*: Great Lakes Hydro America, LLC requests Commission approval of amendment of Article 408 to eliminate the water level management requirements in the North Twin impoundment for lake trout spawning/incubation. The propagation of wild lake trout has not been successful after several years of controlling the reservoir levels in compliance with Article 408. Removal of reservoir level requirements for lake trout would provide more flexibility in providing power and non-power benefits at the development including the maintenance of higher flows to benefit the tailwater fishery. Great Lakes Hydro America, LLC proposes to request a modification to its Water Quality Certificate from the Maine Department of Environment Protection.
