

recordkeeping burden of 10 hours per unit and a one-time reporting burden of two hours per unit. EPA estimates 14 new or lateral expansions of existing construction and demolition landfills will choose to upgrade and will not be eligible to use alternative ground-water monitoring techniques. The Agency assumes the one-time reporting requirement of 20 hours per unit would result for these 14 new or lateral expansions of existing units. EPA estimates the total annual reporting burden for detection monitoring to be 32 hours per year for the 134 existing units and the 14 new or lateral expansions of existing units per year. The annual recordkeeping requirement burden is two hours for each unit. For assessment monitoring, EPA estimates that this rule would impose an annual reporting burden of 32 hours per occurrence per year. For corrective action, EPA estimated an annual reporting burden of 200 hours per year to document progress in clean-up activities. There are annual recordkeeping burdens at §§ 257.27(b), 257.28(c)(4) and 257.28(e)(2). Each of these annual recordkeeping burdens requires two hours per unit, for a total of six hours. EPA estimates that the recordkeeping requirement at § 257.30 to place notifications in the operating record will impose a one-time recordkeeping burden of 10 hours on 1 new or lateral expansion of an existing unit per year.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 74 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Private Solid Waste Disposal Facilities, States.

Estimated Number of Respondents: 152.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 11,220.

Estimated Total Annual Cost: \$2,097,810, which includes \$520,151 in annualized labor and \$1,577,659 in annualized capital or O&M costs.

Changes in the Estimates: There is a change of 1 hour in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This is due to a constant number of Construction & Demolition landfills and an adjustment due to rounding numbers.

John Moses,

Director, Collection Strategies Division.
